RE: Injection Pressure Increase Southeast Maljamar Grayburg San Andres Unit Waterflood Project Lea County, New Mexico

Dear Mr. Martin:

Reference is made to your request dated September 29, 1994 to increase the surface injection pressure on the above referenced well. This request is based on a step rate test conducted on September 8, 1994. The results of the test have been reviewed by my staff and we feel an increase in injection pressure on this well is justified at this time.

You are therefore authorized to increase the surface injection pressure on the following well:

Well and Location	Maximum Injection Surface Pressure
Southeast Maljamar Grayburg San Andres Tract 9, No.2 Unit A, Section 32, Township 17 South, Range 33 East	1825 PSIG
This well located in Lea County, New Mexico.	

Injection Pressure Increase
Cross Timbers Operating Company
October 5, 1994
Page 2

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected water is not being confined to the injection zone or is endangering any fresh water aquifers.

Sincerely,

A handwritten signature in cursive script, appearing to read "William J. LeMay". The signature is written in black ink and is positioned above the typed name and title.

William J. LeMay
Director
