Re: E. E. Elliot SWD Well No. 1  
Unit D, Section 26, T-30N, R-9W,  
San Juan County, New Mexico

Attention: Regulatory Compliance Section

Dear Sir:

In an effort to update our records concerning the E. E. Elliot SWD Well No. 1, the Division is requesting that you supply the following described information:

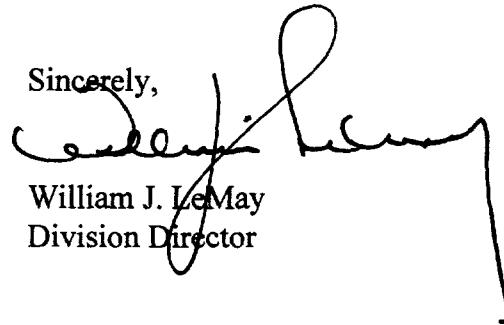

A description and analysis of the fluid being injected into the commercially operated E. E. Elliot SWD Well No. 1. This includes an analysis of each and every water source and a description of its point of origin (i.e. San Andres produced water from the Grayburg-Jackson Pool). In addition, this includes water delivered to the well by pipeline and truck.

Division and Federal UIC Rules and Regulations require that all operators of disposal wells provide source water analysis at a reasonable frequency. Our records indicates that the E. E. Elliot SWD Well No. 1 was permitted by Amoco Production Company in July, 1990. Our records further indicate that the well was originally proposed to be utilized to dispose of produced water only from the Fruitland Coal formation.

Please provide the information requested within 60-days from the date of this letter. If you need additional time, or you wish to discuss the matter further, please contact Mr. David Catanach at (505) 827-8184.

Failure to comply may result in the imposition of fines and/or the termination of injection authority.

Sincerely,

A handwritten signature in black ink, appearing to read 'William J. LeMay', with a long, sweeping horizontal stroke extending to the right.

William J. LeMay  
Division Director
