RE: ***Amendment to Commingling Order PLC-175***

North Indian Basin Unit Well 32, and Federal IBA Gas Com Wells 1 and 2, Section 15, T-21-S, R-23-E and Indian Basin "A" Wells 2, 3 and 4, Section 22, T-21-S, R-23-E
Federal Lease Nos. NM 05612A, NM 0384628, NM 5608, and Com Agreement SW-280

Dear Mr. Catanach:

Marathon Oil Company, as operator of the aforementioned leases, respectfully requests administrative approval for an amendment to the surface commingling, off lease measurement and storage, and alternative measurement of hydrocarbon production from the subject wells. The amendment is to add the Indian Basin "A" #4 well to the agreement and to correct the current methods of transportation and measurement.

Marathon has made notification to all parties owning an interest in these leases of the intent to amend this commingle agreement. Attached, as part of this application, is a copy of the letter submitted, by certified mail, to each interest owner and a copy of the sundry notice that was sent to the Bureau of Land Management along with all its attachments. The interest owners, including all working, royalty and overriding royalty interests, of the three Indian Basin "A" wells are identical. The interest owners, including all working, royalty and overriding royalty interests, of the other three wells are identical, (see Com Agreement SW-280). The production from each lease will be separately measured prior to commingling.

Marathon proposes to modify the existing satellite facility where the production from these wells will be gathered. This satellite facility is located at UL "K", Section 15, T-21-S, R-23-E, Eddy County, New Mexico. This facility, after modification, will consist of five 3-phase separators. The first production separator will measure the three Indian Basin "A" wells. The second separator will be used as a test separator for the Indian Basin "A" wells. The Federal IBA Gas Com #1, #2 and the North Indian Basin Gas Com #32 wells, will be individually measured through the three remaining separators. The gas will be metered before entering the Loop Gas Gathering System, it will then be compressed and transported to the Indian Basin Gas Plant (UL "G", Section 23, T-21-S, R-23-E, Eddy County, NM) for further processing. After processing, the gas and NGLs will be metered at the tail-gate of the plant and enter the transportation line to be transferred to various sales points. Liquid hydrocarbon and water production will be measured using turbine meters as the Alternative Measurement Method. These meters will be

proved on a regular schedule. The liquid hydrocarbon production will then be sent, via pipeline, to the Storage and Measurement Facility located at the Indian Basin Gas Plant where it will be metered again and sold through a LACT unit. The water production will be sent to a storage tank on the satellite facility location and then injected into various water disposal wells per prior approvals. All production will be allocated to the Indian Basin "A" wells based on monthly well tests and using the lease allocation formula shown in the attachments. The drawings attached to the Sundry notice illustrate the proposed separation equipment and the proposed flow of production from the wellhead to the satellite facility. There is also a map of the area attached.

Sincerely,

Re: Amendment of Off-Lease Storage, Measurement, Sales and Commingling Agreement

Leases Affected:

North Indian Basin Unit Gas Com (SW-280, NM 05608)
Federal IBA Gas Com (SW-280, NM 05612A, and NM 0384628)
Indian Basin "A", #2, #3, and #4 wells only (NM 05612A)

Sections 15 and 22 of T-21-S, R-23-E, Eddy County, New Mexico

Gentlemen:

Marathon Oil Company is proposing to amend the Off-Lease Storage, Measurement, Sales and Commingling Agreement that covers the above named leases. Marathon proposes to modify the existing satellite facility where the production from these wells will be gathered. This facility will consist of five 3-phase separators. The first production separator will measure the three Indian Basin "A" wells. The second separator will be used as a test separator for the Indian Basin "A" wells. The Federal IBA Gas Com #1, #2 and the North Indian Basin Gas Com #32 wells, will be individually measured through the three remaining separators. A copy of the complete application is attached and explains the proposed operation in detail. Our records indicate that you are an interest owner in one of the subject leases and, as such, pursuant to NMOCD rules and regulations, are requested to provide your consent to this amendment.

Please indicate your approval by signing in the space below and returning one copy of this letter to this office in the enclosed envelope. The second copy is for your files. If you have any questions, please call me at (915) 687-8321. Your prompt attention to this matter will be greatly appreciated.

Sincerely,

Ginny Larke
