Comingling Application

Westates Petroleum Company  
Carlson B-26 #7 "J" 26; 25s; 27e.  
Justis (Blinebry) Undesignated  
(Paddock) Lea Co., New Mexico

New Mexico Oil Conservation Commission  
P.O. Box 871  
Santa Fe, New Mexico

Attention: Mr. A.L. Porter, Jr., Secretary-Director

Gentlemen:

In Accordance with Case No. 1850, Order No 1597, Rule 303-A.

Application for dual completion was presented for approval September 29, 1960. A Baker drillable packer is set at 5088' separating the production horizons. The perforations in the Blinebry formation are from 5110' to 5162'. The Perforations in the Paddock formation are from 5042.5' to 5060'. Each zone is producing through separate strings of 23/8" tubing. Separate metering separators are being used for each zone. Each zone is producing sour crude. The gravity of the Blinebry is 37.9 degrees corrected to 60 degrees. The Paddock 37.8 degrees corrected to 60 degrees. The gravity should not be effected upon comingling. The commercial value of the oil will not change due to comingling. The royalty owners are the same on each zone. Attached is platt showing tankage to be used upon approval of this application.

Yours very truly,  
Westates Petroleum Company

Clovie Tiffin  
Production Superintendent
