Mr. A. L. Porter, Jr.
New Mexico Oil Conservation Commission
Box 2088
Santa Fe, New Mexico

Dear Sir:

Administrative Order PC-87, dated July 19, 1962 granted permission to commingle the Blinebry and Eunice production on our Bell Ramsay (NCT-A) lease comprising Lots 4, 5 12 and 13 and W/2, SW/4, Section 4 and W/2, NW/4 and W/2, SW/4 Section 9, both in 21-S, 36-E, after separately metering the production from the Blinebry Pool, which consisted of wells capable of producing top allowable.

Since January, 1963 the Blinebry wells on this lease have not been capable of producing top pool allowable.

Permission is hereby requested to remove the Blinebry metering system and determine the production by well test conducted periodically in accordance with the provisions of the Commission "Manual for the Installation and Operation of Commingling Facilities".

Yours truly,

C. D. BORLAND
