Gentlemen:

Effective June 16, 1971, the two above-captioned leases ceased zone commingling; therefore, the existing permits are no longer required and may be cancelled. In each case, the production has been divided into individual and separate battery facilities. The Glorieta production from each lease required oil transporter changes which have already been completed and approved.

Please delete Permit No. PC-188 for the L. A. Swigart Lease, Vacuum Field, located in Section 25, T17, R34 & R35; and Permit No. PC-223 for the State H, Vacuum Field, located in Section 29, T17, R35.

If further information is required, please contact this office.

Yours very truly,

W. J. Ward
