Attention: Mr. Joe D. Ramey

Dear Sir:

Application for Permission to Surface Commingle Production from SEMU No. 120,
Unit B, Section 14, T20S, R37E, Lea County, New Mexico

Conoco Inc. requests administrative approval under the provisions of Rule 303-B to surface commingle Monument Tubb production from SEMU No. 120 into a commingled tank battery located NE/4 SE/4 of Section 15, T20S, R37E, Lea County, New Mexico. Administrative Order PC-249 gave approval to surface commingle Weir Drinkard, Monument Tubb and Undesignated Blinebry (later Weir Blinebry) after separately metering the production from each pool.

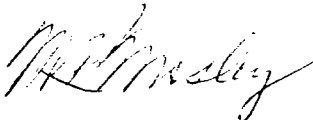

Ownership and working interest for all zones is common. Quality of the crude is virtually identical and commingling will not reduce the commercial value.

SEMU No. 120 is currently producing an average of 27 BOPD, 15 BWPD and 375 MCFGPD. The crude from No. 120 has a gravity of 38° and a value of \$31.96 per barrel.

A lease and battery plat are attached for your review and file. The Monument Tubb production from SEMU No. 120 will be allocated on a well test basis.

If you have any questions, please call David G. Smylie, ext. 120 of this office.

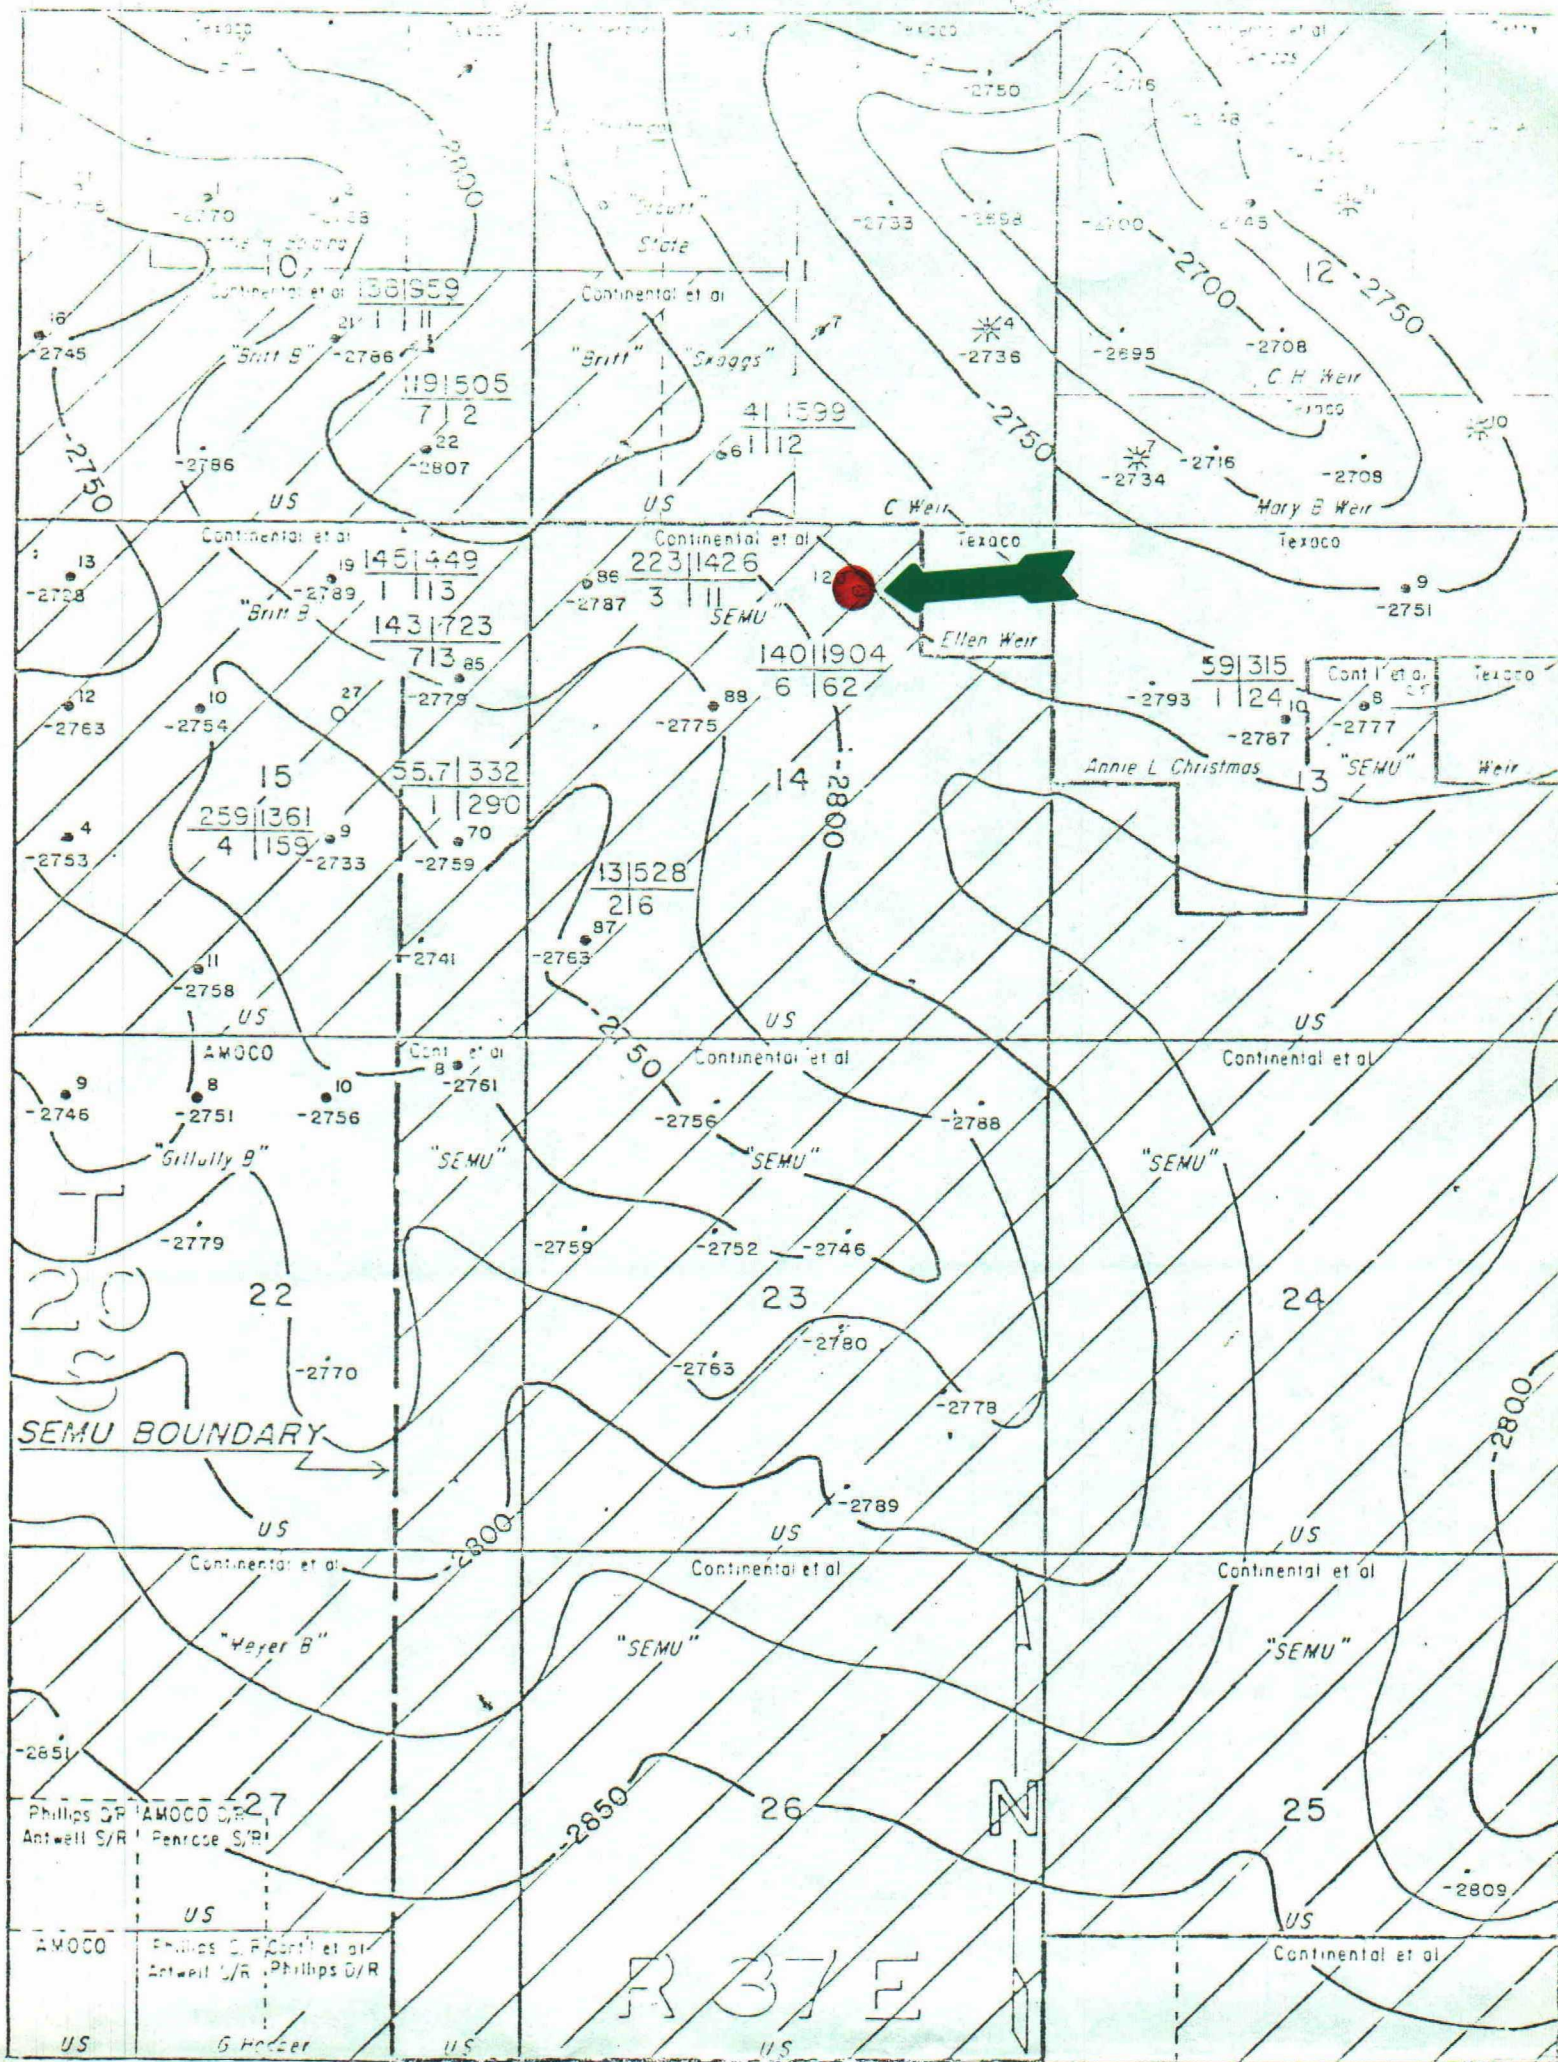

Yours very truly,

DGS:agd
