Re: Common Storage Permit  
Southeast Lea Unit #1 (Dual)  
Wolfcamp (Condensate) & Devonian Oil  
Lea County, New Mexico

Gentlemen:

We are submitting an application for administrative approval to commingle the production from the Wolfcamp-condensate and Devonian-oil zones in the referenced well. This well was completed April 1, 1968 as a dual Devonian and Wolfcamp producer and is located in Southeast Lea County, New Mexico. All of the required New Mexico Oil Conservation Commission forms for drilling permits, acreage dedication, request for allowable and authorization to transport oil, well completion reports, and application for multiple completion have been forwarded and approved by the New Mexico Oil Conservation Commission. Forms requesting new pool designation have also been forwarded for approval.

We believe that our field operation will be more economical with common storage facilities for a commonly owned production from two sources of supply which will be accurately measured prior to commingling and dispersion. A schematic diagram of our separating, metering and storage facilities is enclosed for your examination and records. Our other reason for commingling is based on a better market value for the crude due to the slight gravity drop which occurs from mixing 53° API gravity oil with 55° gravity condensate. Pertinent data which follows below is based on Sinclair's area crude price schedule of \$3.11 per barrel for 40-44° gravity with deductions of 2¢ for every degree above or below this posted price:

Devonian-Oil

Gravity: 53° API  
Value per bbl: \$2.93  
Volume per day: 210 bbls.  
Value per day: \$615.30

Wolfcamp-Condensate

Gravity: 55° API  
Value per bbl: \$2.89  
Volume per day: 1200 bbls.  
Value per day: \$3,468.00

The Sum Total: \$4,083.30

New Mexico Oil Conservation Commission  
April 26, 1968  
Page 2

Commingled Liquid

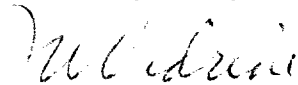

Gravity            51° API  
Value per bbl:    \$2.97  
Volume per day:   1410 bbls.  
Value per day:    \$4,187.70

It is apparent from the data above, that commingling of liquids along with the liquids weathering inside the storage facilities account for a more valuable crude.

We are enclosing required land ownership plats showing the location of the completed well and producing zones for your information and records.

Early consideration of this request will be appreciated. Please notify us if further information is required.

Yours very truly,

  
J. W. Vidrine  
District Engineer

Attn: J.W. Vidrine, District Engineer

Gentlemen:

The Commissioner of Public Lands hereby approves your request of May 1, 1968 to commingle production from the Wolfcamp-condensate and Devonian-oil zones in the captioned well, with the reservation that he retain the right to withdraw said approval if, at any time in his discretion, he deems this operation to be adverse to the best interests of the State of New Mexico.

In accordance with the rules and regulations of the State Land Office, there is a \$10.00 filing fee for each commingling action, which you will please remit at your earliest convenience.

Very truly yours,

GUYTON B. HAYS  
Commissioner of Public Lands

Attention: Mr. J. W. Vidrine

Gentlemen:

Reference is made to your application dated April 26, 1968, for authority to commingle oil and condensate production from your Southeast Lea Unit Well No. 1.

Inasmuch as this well is located on state land, it will be necessary that you obtain the consent of the Commissioner of Public Lands for the State of New Mexico, P. O. Box 1148, Santa Fe, to the proposed commingling.

Upon receipt of his consent, we will be happy to process your application.

Very truly yours,

DANIEL S. NUTTER  
Chief Engineer
