Oil Conservation Commission
P. O. Box 2088
Santa Fe, New Mexico 87501

Dear Sir:

Attached please find a revised schematic of the South Peterson Fusselman and Pennsylvanian Pools Central Storage Commingling Facilities, Roosevelt County, New Mexico. The only change we have made since the approval of Commingling Order PC-573, has been the installation of a 3-phase separator for the Lambirth No. 3 well, rather than a 2-phase separator with a sampler.

Sincerely,

Leonard Kersh
District Petroleum Engineer

LK/fc
