*Re: Additional Information  
Required for Surface  
Commingling Application*

Dear Ms. Throneberry,

Your company's application for surface commingling is lacking information as to the method of determining allocation of production for the subject pools. Please indicate one of the following:

- 1) Separately metering the production from each pool prior to commingling, or;
- 2) Separately metering the production from the [FIRST] Pool and determining the production from the [SECOND] Pool by the subtraction method, or;
- 3) Well tests. (If this method is to be authorized, all commingled production must be of marginal nature; further the operator shall notify the Santa Fe Office of the Division in the event any well in the commingled battery becomes capable of top allowable production, at which time the Division will amend this order or take such other action as may be appropriate.)

As soon as this information is received, I will expedite the continued processing of your application. If I may be of assistance, please don't hesitate to call. (505) 827-5827.

Very truly yours,

Benjamin E. Stone  
Engineering Tech II
