Roswell, New Mexico

Attention: Mr. T. H. Dwyer

Administrative Order PLC-6

Gentlemen:

Reference is made to your letter dated October 31, 1963, wherein you request authority to commingle San Andres and Paddock production from your State A, State B, State F, and State H Leases, Vacuum Field, Lea County, New Mexico, after separately metering the Paddock production and determining the San Andres production by means of the subtraction method. It is our understanding that the ownership of each of the four leases, including working interest, royalty, and overriding royalty, is identical throughout and that production from the two zones to be commingled will be allocated to each of the leases on the basis of periodic well tests. Order No. R-1920-A previously authorized the commingling of San Andres production from the four leases.

Pursuant to the authority granted me under the provisions of Rules 303 (b) and 309-B of the Commission Rules and Regulations, you are hereby authorized to commingle the production from the aforesaid pools and leases in the above-described manner. Provided however, that the installation shall be operated in accordance with the Commission "Manual for the Installation and Operation of Commingling Facilities," including the requirement for non-reset counters on the meters.

1. *Phragmites australis* (Cav.) Trin. ex Steud.

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group (C) and the experimental group (E). The control group was subjected to a standard training protocol, while the experimental group was subjected to a modified training protocol. The subjects were then subjected to a test protocol, and the results were compared between the two groups.

[illegible]

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is responsible for the investigation. The investigator must identify the problem and the scope of the investigation. The investigator must also identify the objectives of the investigation and the methods to be used. The investigator must also identify the resources available for the investigation.
