Caulkins Oil Company
P. O. Box 780
Farmington, New Mexico 87401

Gentlemen:

Your letter of January 27, 1975, requests approval to commingle, on the surface, the distillate production from the Mesaverde and Dakota zones from lease New Mexico 03381. After measurement on the lease, the production will be trucked to Tanks 40064 and 40065 on the Shell gathering system, where it will be commingled with production from other Federal leases of the same working and royalty interests, to be sold.

Your application is hereby approved, providing the ownership remains the same, the products are measured on the lease, and the value of the products remain identical. You are advised to obtain appropriate approval from the New Mexico Oil Conservation Commission for the proposed action.

Sincerely yours,

Jerry W. Long
District Engineer

Caulkins Oil Company
P. O. Box 780
Farmington, New Mexico 87401

Gentlemen:

Your letter of January 27, 1975, requests approval to commingle, on the surface, the distillate production from the Mesaverde and Dakota zones from lease New Mexico 03554. After measurement on the lease, the production will be trucked to Tanks 40064 and 40065 on the Shell gathering system, where it will be commingled with production from other Federal leases of the same working and royalty interests, to be sold.

Your application is hereby approved, providing the ownership remains the same, the products are measured on the lease, and the value of the products are identical. This approval does not apply to allocated production from your No. 389 well, located in the SW $\frac{1}{4}$ sec. 13, T. 26 N., R. 6 W., on lease Santa Fe 079184, involving the SW $\frac{1}{4}$ sec. 13, T. 26 N., R. 6 W., of subject lease, pursuant to Communitization Agreement SW-16. You are advised to obtain appropriate approval from the New Mexico Oil Conservation Commission for the proposed action.

Sincerely yours,

Jerry H. Long
District Engineer

Farmington, New Mexico 87401

Gentlemen:

Your letter of January 27, 1975, requests approval to commingle, on the surface, the distillate from the Mesaverde and Dakota zones from lease New Mexico 03551. After measurement on the lease, the production will be trucked to Tanks 40064 and 40065 on the Shell gathering system and commingled with production from other Federal leases of the same ownership, to be sold.

Your application is hereby approved, providing the ownership remains the same, the products are measured on the lease, and the value of the products are identical. This approval does not extend to your No. 50 well, located in the NE $\frac{1}{4}$ sec. 5, T. 26 N., R. 6 W., on subject lease, because it is communitized with lease Santa Fe 079186 which involves different ownerships. You are advised to obtain appropriate approval from the New Mexico Conservation Commission for the proposed action.

Sincerely yours,

Jerry H. Long
District Engineer
