Attention: Mr. Joe D. Ramey, Director

RE: David Fasken  
Consolidated State Lease  
Midway (Strawn) Field and  
Consolidated "A" State Lease  
Midway (Devonian) Field  
Lea County, New Mexico  
Rule 309-B

Gentlemen:

On behalf of our client, David Fasken, we are requesting exception to the requirements of Rule 309-A of the Division Rules & Regulations and for administrative approval, commingling of production from two separate leases in a common tank battery - Rule 309-B.

A plat of the two wells on two separate leases showing their locations is enclosed. The No. 2 Consolidated State is a Strawn completion and the No. 1 Consolidated "A" State is a Devonian completion, therefore a separate request for exception to Rule 303-A is also being filed.

These are one well producing leases at this time and the two oil streams will be commingled down-stream of individual meters and emulsion treaters. Essentially the same physical surface equipment as illustrated in Fig. 1 of the Manual For The Installation And Operation of Commingling Facilities.

A tabulation of all interest owners in these leases is enclosed. Each owner was notified by certified mail of this request to commingle and each was provided a waiver letter to execute. The crude oil purchaser P&O Falco, Inc., Shreveport, La. was also notified by certified mail.

If you have any questions concerning this request, please contact me at 915-683-1893.

Yours Truly,

  
Robert H. Angevine

Re: David Fasken  
Consolidated State Lease (Strawn)  
State Lease No. E-8563  
and  
Consolidated "A" State Lease (Devonian)  
State Lease No. E-8563  
Midway Field  
Lea County, New Mexico

TO ALL INTEREST OWNERS:

On behalf of our client, David Fasken, we are requesting permission from the New Mexico Energy and Minerals Department, Oil Conservation Division to do two things:

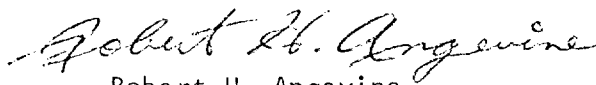

1. Comingle production from two separate leases - Rule 309-B.
2. Surface comingle production from two different reservoirs or sources of supply. The Strawn and Devonian reservoirs in this application - Rule 303-B.

This request along with the companion request for off-lease storage will eliminate duplication of surface facilities with a cost estimated at \$90,000.

Enclosed are three (3) copies of a waiver letter. If you concur and have no objections to the two comingling provisions, please sign and return two (2) copies of the waiver letter to Henry Engineering, 807 First National Bank Building, Midland, Texas 79701, keeping the other copy for your files.

Yours truly,

HENRY ENGINEERING

Re: David Fasken  
Consolidated "A" State Lease  
State E-8563  
Midway (Devonian) Field  
Lea County, New Mexico  
Rule 309-C

Gentlemen:

On behalf of our client, David Fasken, we are requesting exception to the requirements of Rule 309-A of the Division Rules & Regulations and for administrative approval, off-lease storage, Rule 309-C, for the subject lease. This request is based upon further utilization of existing equipment and storage facilities, the present connection into Texas-New Mexico Pipeline and elimination of duplicate facilities with an installed cost on the order of \$90,000.00.

A plat is attached showing a tank battery location in Unit G, Sec. 8, T-17-S, R-37-E, Lea County. This tank battery was constructed to serve the Consolidated State Lease, and off-lease storage was approved for that lease on June 29, 1981.

The Consolidated State Lease, No. E-8563, includes N/2, NE/4 and SW/4 Sec. 8, T-17-S, R-37-E and the W/2 Sec. 9, T-17-S, R-37-E, Lea County, while the Consolidated "A" State Lease, No. E-8563, covers only the S/2, SE/4 Sec. 8, T-17-S, R-37-E, Lea County (Please refer to attached plat).

Also enclosed is (1) a complete list of ownership in both leases, (2) a copy of a letter requesting waiver of objection to off-lease storage by each owner and/or (3) a copy of an executed waiver letter from the owners.

Any questions you may have concerning this request should be directed to myself or Mr. James B. Henry at 915-683-1893.

Yours very truly,

HENRY ENGINEERING

RE: David Fasken  
Consolidated "A" State Lease Well No. 1  
Midway (Devonian) Field  
Lea County, New Mexico

To All Interest Owners:

On behalf of our client, David Fasken, we are preparing a request to the New Mexico Energy and Mineral Department, Oil Conservation Division for off-lease storage. This will provide an immediate pipeline connection from an existing facility and the elimination of duplicate facilities with an estimated installed cost of \$90,000.

Enclosed are three (3) copies of a waiver letter. If you concur with this request for off-lease storage, please sign and return two (2) copies of the waiver letter to Henry Engineering, 807 First National Bank Building, Midland, Texas 79701, keeping the other copy for your files.

Yours Truly,

# HYDRAULIC SUBSURFACE PUMPING INSTALLATION

1. Automatic well test header valves on individual well flowlines may be substituted for valve "H". Interlocking control as shown would then be required between each valve on the manifold and the respective valve "T".
2. Manual, pneumatic, or electrical interlocks must be provided between the appropriate valve "H" and valve "T" as shown. Control panel [C] and control lines to valves are not required if mechanical interlock is provided for manual operation.
3. Manual overrides on automatic well test header valves on individual well flowlines may be installed on production side only.
