RE: ADMINISTRATIVE APPROVAL OF UNORTHODOX LOCATION
SAN JUAN 30-4 UNIT #50 WELL
2260' FSL & 345' FWL
SECTION 22-T30N-R4W
RIO ARRIBA COUNTY, NEW MEXICO
EAST BLANCO PICTURED CLIFFS

Dear Mr. Stogner:

Energen Resources Corporation requests administrative approval for an unorthodox location of its San Juan 30-4 Unit #50 well under the provisions of NMOCD general Rule 104.

At the request of the Forest Service to locate our proposed San Juan 30-4 Unit #50 well where it would not disturb archeological resources and due to steep terrain within a legal window it is necessary to request an unorthodox site for this well. For these reasons we are requesting administrative approval for the drilling of our proposed well 2,360' FSL and 345' FWL of Section 22-T30N-R4W, Rio Arriba County, New Mexico.

Energen Resources Corporation as operator of the San Juan 30-4 Unit intends to drill four (4) unit wells during the 2001 season (April 1 through November 1, 2001) and one (1) non unit well within this area. A plan of development for the San Juan 30-4 Unit setting out our drilling plans will be submitted in January of 2001. We have begun the permitting process for one Mesaverde and four Pictured Cliffs wells in our ongoing development of this area. Energen is the operator of all surrounding spacing units except the SW Common Corner (NE/4 of Section 28).

A copy of this application is being submitted to all offset operators by certified mail with a request that they furnish your office in Santa Fe a Waiver of Objection.

Attached is a well location plat showing dedicated acreage, a topographic plat of the area, a map showing all offsetting operators and a request from the district Ranger of the Carson National Forest for an unorthodox location.

Sincerely,

A handwritten signature in cursive script that reads "Richard Corcoran".

RE: Unorthodox location for well: San Juan 30-4 #50

Dear Mr. **Corcoran**,

The Jicarilla Ranger District, Carson National Forest is requesting you apply for an unorthodox location as follows, as discussed by your company representative and Camela Hooley of this office:

San Juan 30-4 #50, T30N R4W Sec.22, 2360'FSL/345'FWL

The mineral operator is required to comply with other applicable regulations such as the Endangered Species Act and the Archeological Resources Protection Act under 36CFR228.112(c). The operator is also required under 36CFR228.108(c) to minimize or prevent damage to surface resources. The Carson National Forest Management Plan states that surface resource impacts will be minimized when administering mineral resources.

The following conditions apply which require an unorthodox location:

☒ Archeological resources prevent locating the well in an orthodox location.

☐ Topography prevents locating the well in an orthodox location.

☐ Threatened/endangered species concerns prevent locating the well in an orthodox location.

☐ Prevention of unnecessary resource damage requires the location be unorthodox. (Such as a previously disturbed area or existing road available outside the drilling window.)

Thank you for your cooperation in this matter.

Mark S. Catron
District Ranger

Dear Interest Owner:

Energen Resources Corporation has filed with the New Mexico Oil Conservation Division (NMOCD), an application for the Administrative Approval of an Unorthodox Location for its San Juan 30-4 Unit #50 well. A copy of the application has been attached for your review.

If you have no objection to this unorthodox location, please sign the three copies of the attached waiver, return one executed copy to the NMOCD in Santa Fe, New Mexico, one copy to our office and retain one copy for your files. Self-addressed envelopes are enclosed.

Your cooperation in this matter is appreciated.

Sincerely,

A handwritten signature in cursive script that reads "Richard P. Corcoran".

To: Stogner, Michael
Subject: Energen apps

Mike,

I concur with Energen's topographic reasons for a non-standard location for the SJ 30-4 #50 well.

I also concur with the SJ 32-5 #9C application. There are hardly any available areas in the section 30 part of this GPU.
