MSF-1678?

Dear Mr. Stogner:

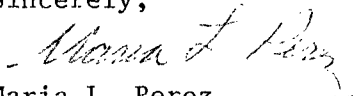

This well was formerly operated by Doyle Hartman. On October 7, 1991, I submitted form C-104 to return this TA'd well back to production and to change Operator name to Meridian. A form C-102 was given to us by Doyle Hartman in the file records which had previously been assigned the SE/4 Sec. 4, 160 acres gas proration unit.

Your Hobbs district office informed me that there is now a well operated by Chevron, the J. F. Janda NCT-J #2, in unit letter P, SE/4 SE4 Sec. 4, 40 acre assigned to it. We now have to request a non-standard proration unit in order to produce this well.

Enclosed is Copy of form C-102 rededicating acreage to a Non-standard 120 acres. A list of the offset operators is attached. Offsets were notified by registered mail on 2/13/92.

Should you require additional information on this request, please contact me at A/C 915-688-6906.

Sincerely,

Maria L. Perez
Prod. Assistant

Re: Wells Which Still Need C-104 for Change of Transporter
from EPG to Sid Richardson

Gentlemen:

The wells listed below show El Paso as gas transporter. Some of them do not show production but we have received no disconnect notice or a request to TA these wells. Since El Paso is no longer the transporter, please file C-104 showing Sid Richardson, a disconnect notice, or request to TA these wells.

We are returning Form C-104 filed Oct. 22, 1991, indicating you planned to return this well to production as a Jalmat gas well. This well cannot be produced as a Jalmat gas well with the 160-acres (SE/4 Sec. 4) dedicated to it, because Chevron's J.F. Janda NCT-J #2-P, a Jalmat oil well, lies within this proration unit. Should Meridian decide to return this well to production you will need to have the NSP reduced to 120-acres. (Talked to Maria Perez about this but have heard nothing back).

Very truly yours,

OIL CONSERVATION DIVISION
