> Re: Non-Standard Proration Units Vaughn B-3 Lease N/2 Sec 3, T24S, R36E Lea County, New Mexico

Dear Sir:

On September 1, 1979, the Yaughn B-3 #4 well was reclassified from oil to gas. All 320 acres of the Vaughn B-3 lease are currently assigned to the Vaughn B-3 #1 gas well. In order to optimize the recovery from the Jalmat pool from which these wells are producing, administrative approval of two non-standard proration units is requested. The acreage to be assigned to the Vaughn B-3 #4 gas well would be the 160 acres comprising the NE/4 of Sec 3. The acreage of the Vaughn B-3 #1 gas well would be reduced from the present 320 acres (entire lease) to the 160 acres comprising the NW/4 of Sec 3.

The Vaughn B-3 #4 well is in the process of being separately metered and should be completed soon. The well will remain shut in until approval of the acreage is granted.

The acreage to be dedicated to each well is indicated on the enclosed Forms C-102. Form C-104 is not required for the Vaughn B-3 #4 because the transporter will not change.

We are submitting a copy of this letter by certified mail to all offset operators. Any objection to the formation of these non-standard units must be filed within 30 days of the receipt of this letter.

If you require additional information, please call me at (303) 861-

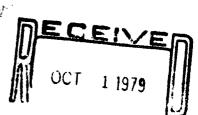

ECEIVLD OIL CONSERVATION DIVISION SANTA FE
