**Re: Joell #2
1530' FNL & 1130' FEL
E/2 Section 6-T23S-R27E
Eddy County, New Mexico**

Gentlemen:

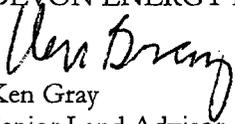

By letter dated June 20, 2003, Devon Energy Production Company, L.P. (Devon) proposed the drilling of the referenced well as a Morrow test well expected to require drilling to a depth of approximately 12,000' and provided you will find two (2) copies of Devon's Authority for Expenditure (AFE) reflecting estimated dry hole costs of \$863,000 with estimated completed well costs of \$1,457,490 and dedicating the E/2 of Section 6 as the spacing unit.

Due to the proximity of the location to an existing dwelling, Devon has elected to re-stake the Joell #2 at the referenced location. The above-mentioned AFE estimates shall remain the same. Devon will re-open Compulsory Pooling Case No. 13132 before the New Mexico Oil Conversation Division on March 18, 2004 for the purposes of amending Order No. 12094 or in the alternative, issue a new order reflecting the new location. Attached is Devon's application to re-open case No. 13132.

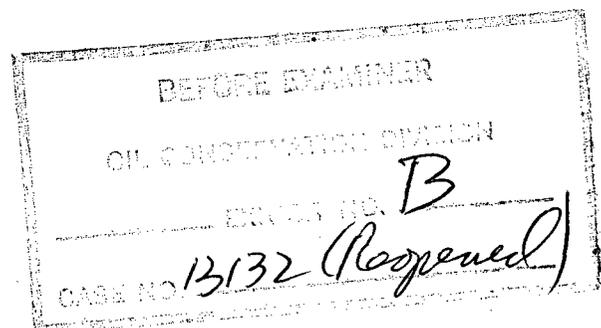

If there are any questions or if additional information is required feel free to call me at 405-552- 4633.

Yours very truly,

DEVON ENERGY PRODUCTION COMPANY, L.P.
