Re: Case 13344

Application for an unorthodox gas "Infill" well location for San Juan 27-4 Unit Com Well
No. 34-N, E/2 Section 34, T27N, R4W, Rio Arriba

Dear Mr. Stogner:

This case was filed administratively and because of an objection by ConocoPhillips (Scott Hall) was set for hearing on September 16, 2004.

On behalf of Burlington, please dismiss their application. This well's surface location is as required by the US Forrest Service, but Burlington will refile it requesting approval to directional well from this unorthodox surface location to a standard bottomhole location not closer than 660 feet to the South and East side boundaries of this section.
