Subject: RE: Pressure maintenance question

Good morning, Adam,

The order in case 14835 appears to specifically limit the waters to be injected to those from the Menefee formation and produced from the project area.

In view of this unusual provision, I believe a new hearing application and hearing order will be required to allow injection of water from any other sources.

Sincerely
David K. Brooks

Phillip and David,

Attached is the original order. Do we need approval to inject additional fluids? Our client was approached by a neighboring operator to inject off-lease fluids. I am waiting to hear if the proposed fluids would be from the same formation that is currently being injected (Menefee, if I recall correctly).

If so, do we file it for administrative approval as a supplement to the C-108? Or does it actually have to go to hearing again? Hope not.

Thank you both.

Adam
