**RE: Request for Extended Time to Complete the well under  
NMOCD Pooling Order No. 13743  
Ann Com No. 1  
1655' FNL & 1980' FEL  
Sec 15-24S-28E: N2 Spacing Unit  
Eddy County, NM**

Gentlemen,

On September 6, 2013, the NMOCD entered Order No. R-13743 pooling the uncommitted interests on the above referenced well. RSC Resources, L.P. respectfully requests an extension of time to comply with paragraph (5), which requires the well be drilled and completed within 120 days of commencement. RSC requests an extension of an additional 180 days to finish completion operations due to delays on tie-in to gas pipeline.

The Ann Com 1 was successfully re-entered and the Wolfcamp perforated and acidized. The well flowed 600 MCFD and has been shut in waiting on gas pipeline tie-in since 7/25/2013. In order to effect an optimum completion, Guardian Operating still plans to fracture stimulate the existing perforated zone, perforate and fracture stimulate another Wolfcamp interval, and build production facilities. The well must have a pipeline tie-in before proceeding with the rest of the completion. Guardian believes it should have the tie-in by March 1, 2014 and can finish completion operations by April 1, 2014. At that time Guardian would submit the itemized schedule of actual costs as required by paragraph (9) of the Order.

Please contact the undersigned with any questions.

Best Regards,

Randall Cate  
President
