Subject: Re: Question on Cases 15143 and Case 15089

The Owl Draw "22" W1AP Fed Com No. 1H (Case #15143) will be the first well drilled. The Owl Draw "22" BO Fed Com No. 1H (Case #15089) will be the subsequent or infill well.

Subject: Question on Cases 15143 and Case 15089

Jim:

I have am writing the order for these two Mewbourne applications/cases and would like some additional info. This thought did occur to me during hearing, but I didn't ask it. Only one well of the two wells proposed for the 320-acre project area can be dedicated to that project area, the other well becomes the infill. Since the Owl Draw 22 WIAP Fed has the unorthodox location, I am assuming it would be the first to be drilled since the rig will also be drilling another well to the north in Sec 15. Please confirm with your client as to the order of drilling for the two wells – the first to be the dedicated well - before I have to rewrite two orders because I forgot to ask. Thanks. PRG
