Logging Instructions

Open Hole Logging
 Cased Hole Logging
 Logging Engineer:

Notify Richard Freeman or other identified geologist before realtime logging services. (rffreeman@conchoresources.com)
 Notify Richard Freeman or other identified geologist before realtime logging services. (rffreeman@conchoresources.com)
 Press mud sample and measure mud filtrate and mudcake resistivity at measured temperature. Measure mud resistivity at temperature. Record bottom hole temperature on every descent.

Logging Company Instructions:

Provide Richard Freeman and or Other Identified Geologist(s), realtime access to logging operations and chat availability as requested prior to and during logging operations. Prior to logging, provide header image file for data accuracy verification.
 On conclusion of each log run, prepare and provide image file(s).
 On conclusion of logging, forward all data files to logging company processing center and Commence processing of any processed logs as appropriate interval information is available including Mechanical Properties logs, formation Image logs, and interpretations. Forward resulting Image and data files of the interpretations on completion of processing.

Provide Data to:

Header review - Richard Freeman and Other Identified Geologist(s)

=> Data files to Richard Freeman & Identified
 => Files to Richard Freeman and Other Identified
 => Data to Richard Freeman and Other Identified Geologist(s). Final prints mailed to COG Operating LLC - attn: Richard Freeman

Other Geologist Email: other@conchoresources.com
