Michael, I've conferred with the XTO landman, and there are no depth severances in the Bone Spring. Please let me know if you have any additional questions.

Thanks,  
Jordan

Mike and Jim:

I need verification that NO DEPTH SEVERANCES EXIST WITHIN THE BONE SPRING FORMATION!!!!

The problem in these cases is that XTO requested Nash Draw Delaware/BS (Avalon) Pool. But the objectives is below the Avalon in the 2<sup>nd</sup> and 3<sup>rd</sup> Bone Spring.

Your notification for Bone Spring formation is acceptable, and the Pool has been redesignated by the OCD to the Forty Niner Ridge Bone Spring.

Call or e-mail me with questions  
Mike
