Subject: Apache Applications - Palmillo

Mike,

Please see the below explanation for the NSL request provided by Apache. Apache has asked that I forward this information to you.

Thank you,
Jennifer

Subject: RE: Apache Applications - Palmillo

Apache desires to perforate and complete up to 100' from the section lines (instead of 330') to minimize unstimulated reservoir. If the new horizontal rules take effect before our completions, these locations will no longer be NSL's.
