Subject: [EXT] Support the Hilcorp Pool rule application

Dear Commissioners,

Please approve Hilcorp's application for an amendment to the 'pool rule'. This will improve the rule in regards to the well density and location requirements and administrative exceptions of the special rules for the Blanco-Mesaverde Gas pool, Rio Arriba and San Juan Counties, New Mexico (Case 16403). It is the responsibility of the Oil Conservation Commission to ensure that the resources of our great state are being developed.

The "environmental" groups have opposed this new plan based on fictitious claims that Hilcorp is proposing thousands of new "unnecessary" wells, that they intend to pollute, and that they are using fresh drinking water to frack. None of these things are true.

We are asking that you not allow emotional and false claims of these activists to affect your decision. Please disregard the distorted political rhetoric and approve an application that is in the best interest of the state and the development of our plentiful resources.

Sincerely,
Charles Combs

Subject: [EXT] Support the Hilcorp Pool rule application

Dear Commissioners,

Please approve Hilcorp's application for an amendment to the 'pool rule'. This will improve the rule in regards to the well density and location requirements and administrative exceptions of the special rules for the Blanco-Mesaverde Gas pool, Rio Arriba and San Juan Counties, New Mexico (Case 16403). It is the responsibility of the Oil Conservation Commission to ensure that the resources of our great state are being developed.

The "environmental" groups have opposed this new plan based on fictitious claims that Hilcorp is proposing thousands of new "unnecessary" wells, that they intend to pollute, and that they are using fresh drinking water to frack. None of these things are true.

We are asking that you not allow emotional and false claims of these activists to affect your decision. Please disregard the distorted political rhetoric and approve an application that is in the best interest of the state and the development of our plentiful resources.

Sincerely,
Larry Parks

Dear Commissioners,

I am writing to ask you to please approve Hilcorp's application for an amendment to the 'pool rule'. This will improve the rule in regards to the well density and location requirements and administrative exceptions of the special rules for the Blanco-Mesaverde Gas pool, Rio Arriba and San Juan Counties, New Mexico (Case 16403). It is the responsibility of the Oil Conservation Commission to ensure that the resources of our great state are being developed and that good jobs are created.

The "environmental" groups have opposed this new plan based on fictitious claims that Hilcorp is proposing thousands of new "unnecessary" wells, that they intend to pollute, and that they are using fresh drinking water to frack. None of these things are true. No for profit company would propose "unnecessary wells." Even Obama's EPA concluded that fracking done properly is not polluting.

We are asking that you not allow emotional and false claims of these activists to affect your decision. Please disregard the distorted political rhetoric and approve an application that is in the best interest of the state and the development of our plentiful resources.

Sincerely,
Lauren Brubaker

Subject: [EXT] Support the Hilcorp Pool rule application

Dear Commissioners,

Please approve Hilcorp's application for an amendment to the 'pool rule'. This will improve the rule in regards to the well density and location requirements and administrative exceptions of the special rules for the Blanco-Mesaverde Gas pool, Rio Arriba and San Juan Counties, New Mexico (Case 16403). It is the responsibility of the Oil Conservation Commission to ensure that the resources of our great state are being developed.

The "environmental" groups have opposed this new plan based on fictitious claims that Hilcorp is proposing thousands of new "unnecessary" wells, that they intend to pollute, and that they are using fresh drinking water to frack. None of these things are true.

We are asking that you not allow emotional and false claims of these activists to affect your decision. Please disregard the distorted political rhetoric and approve an application that is in the best interest of the state and the development of our plentiful resources.

Sincerely,
Bernie Schutz
