**Subject:** [EXT] Produced water

To the Oil Conservation Division,

Hoping this message finds you all well, I would like to take this opportunity to express my vehement disapproval of the use of toxic tracking water for anything other than direct use in a hopefully diminished fracking process. I have a young family that depends on clean water, we take advantage of New Mexico's wilds to the fullest extent that we can, and we are well aware that the chemicals used in fracking are unsafe anywhere in the environment.

I would like this produced water to be strongly regulated and would like to keep the fracking industries' and NMSU's input on any legislation or regulation to be kept to a minimum, since they stand to make money and get a monkey off their back by disposing of their waste water in the open air and on our roads, where it can drain into our drinking water and irrigation systems.

Thank you beforehand for your careful consideration in this matter.

Sincerely,  
Robert Ingliss
