**Subject:** [EXT] In support for strong regulation of fracking waste water

Dear Clerk Davidson,

My name is Megan Schendel and I live in Albuquerque. I'm writing to express my hope that regulation for fracking waste water will be very strong -that we can keep this substance out of our environment and out of our communities!

Fracking waste water should not be used for any other purpose. It should only be reused in other fracking operations.

It should not be 'recycled' into our drinking water or our agriculture or food production.

Regulations for this substance should be explicit, strong, and enforceable.

Lastly, I am greatly concerned about the fracking industry's involvement in research on the safety of reusing fracking water with NMSU.

Thank you for your consideration

Sincerely,

Megan Schendel 87112
