AFFIDAVIT OF TAYLOR FORD

I, being duly sworn on oath, state the following:

1. I am over the age of eighteen years and have the capacity to execute this Affidavit, which is based on my personal knowledge.

2. I am employed as a Landman with Tap Rock Operating, LLC ("Tap Rock"), and I am familiar with the subject application and the lands involved.

3. This affidavit is submitted in connection with the filing by Tap Rock of the above-referenced compulsory pooling applications pursuant to 19.15.4.12.A(1) NMAC.

4. I have not previously testified before the New Mexico Oil Conservation Division.

5. I graduated from Texas Tech University in 2017 with a Bachelor of Business Administration degree in Energy Commerce. After graduation, I worked for Devon Energy focusing on this area of the Permian Basin, until October 1st, 2019. I started my current role as a Landman at Tap Rock February 3rd, 2020.

6. The purpose of this application is to force pool working interest owners into the horizontal spacing unit ("HSU") described below, and in the wells to be drilled in the units.

7. No opposition is expected from any of the parties. There are two parties with an Uncommitted Working Interest: Lilis Energy, Inc and Blackbeard Operating, LLC. The following parties have an Unleased Mineral Interest: Prevail Energy, LLC, Rheiner Holdings, LLC, Cayuga Royalties, LLC, Sharon Jeffreys, Debbie Fogell, The James A. Bryant and Lucille Bryant

Revocable Trust UTA dtd April 26, 2006, as Amended, The Allar Company, The Ohio State University, Douglas A. Denton, Chevron U.S.A., Inc., Jetstream Royalty Partners, LP, A. H. Cole, Aaron Childress, Burlington Resources Oil & Gas Company (Conoco Phillips), Carol A. Noonan, Donald Woods, Estate of Rosalind Leithold, Exile Royalty Company, LLC, HED Enterprises, LP, Hunter G. Davis, John Dwire Atkins, Kassandra Dawn Dittmer, KWF Enterprises, MES Land & Minerals, LP, Monroe Properties, Inc., Michael A. Kulenguski, Nancy Carolyn Haley, Nathan Allen Dittmer, Rowena Lynn Doss, Shamrock Royalty, LP, SRO Land & Minerals, Theodore A. Dittmer, Walker Royalty, LP, and Mary Edwards Williams. Tap Rock has either attempted to reach the above parties or is trying to come to a mutual agreement, whether that be to a JOA or an Oil and Gas Lease.

8. The Estate of James A. Skinner is also an Unleased Mineral Interest owner but has requested to be removed from pooling order while negotiations are being worked out, therefore, Tap Rock is not seeking to pool interest at this time.

9. There are eight potential Unleased Mineral Interest owners with near term lease expirations. Meridian 102, LP could become an Unleased Mineral Interest Owner as to the NWNE and SWNE of Section 18-T26S-R35E only, due to a horizontal pugh if Tap Rock does not meet the CO/CDC obligations in time. Charlie Sumner, Sally Runyan, Jeff Sumner, Jacqueline Jones, and Krystle Sumner McEntire have leases expiring 12/7/2020. Tap Rock has been in contact with Charlie's wife, Sally, who represents the Sumner family, numerous times regarding lease extensions, but no agreement has been made. The remaining two leases for B&G Royalties and EHW, LLC have lease expirations of 4/12/2021.

10. Tap Rock seeks an order pooling all mineral interests in the Jal; Wolfcamp West Pool (Pool Code 33813) underlying (a proximity tract) horizontal spacing unit the W/2 of Section

18 and W/2 of Section 19, Township 25 South, Range 36 East, NMPM, Lea County, New Mexico. The proposed 640-acre spacing unit will be dedicated to the Blue Marlin #202H, #212H, and, #215H, as the defining wells for the units.

11. A proposed C-102 for each well is attached as **Exhibit 1**. The wells will develop the Jal; Wolfcamp West Pool (Pool Code 33813), which is an oil pool.

12. The proposed surface hole, bottom hole, and first take point for each well can be found in the attached **Exhibit 1**. The proposed total vertical depth for each well can be found in the attached **Exhibit 5**.

13. A tract map containing the composition of the HSU is attached hereto as **Exhibit 2** and shows that the HSU is comprised of nine Fee tracts and one Federal tract.

14. The parties being pooled and the nature of their interest are found in **Exhibit 4** attached hereto. **Exhibit 4** also includes information regarding working interest owners and overriding royalty interest owners.

15. There are no depth severances in the Wolfcamp formation in the proposed HSU.

16. I have conducted a diligent search of the public records in Lea County, New Mexico, where the wells will be located, and conducted phone directory and computer searches to obtain contact information for parties entitled to notification. I mailed all parties well proposals, including an Authorization for Expenditure ("AFE").

17. Tap Rock has made a good faith effort to obtain voluntary joinder of the working interest owners in the proposed wells.

18. **Exhibit 5** is a sample proposal letter and the AFE for each of the proposed wells. The estimated cost of each of the wells set forth in the AFE is fair, reasonable, and comparable to the costs of other wells of similar depths and lengths drilled in this area of New Mexico.

19. Tap Rock requests overhead and administrative rates of \$7000/month for drilling a well and \$700/month for a producing well. These rates are fair and comparable to the rates charged by other operators for wells of this type in this area of southeastern New Mexico. Tap Rock requests that these rates be adjusted periodically as provided in the COPAS Accounting Procedure.

20. Tap Rock requests the maximum cost, plus 200% risk charge be assessed against non-consenting working interest owners.

21. Tap Rock requests that it be designated operator of the wells.

22. The Exhibits to this Affidavit were prepared by me, or compiled from Tap Rock's company business records.

23. The granting of this Application is in the interests of conservation, the prevention of waste, and the protection of correlative rights.

24. The foregoing is correct and complete to the best of my knowledge and belief.

Township 25 South, Range 36 East, W/2 of Sections 18 & 19 (the "Wolfcamp Unit")
Lea County, New Mexico (the "Wells")**

Tap Rock Resources II, LLC ("Tap") recently acquired Lilis Energy Inc.'s (ImPetro Oil & Gas, LLC) interest in the Wolfcamp Unit. Accordingly, Tap's, operating entity, Tap Rock Operating, LLC ("TRO"), hereby proposes an amended development plan for the Wolfcamp Unit to drill the following Wells by pad drilling to prevent waste and protect correlative rights. Enclosed are AFEs dated March 6, 2020 for the following:

The proposed locations and drilling plans described above are subject to change depending on surface or subsurface issues that may be encountered. TRO will advise you of any such modifications. A separate AFE for facility costs is forthcoming. Your election to participate in the drilling and completion of the proposed wells will also be considered an election to participate in the construction of the production facility.

It is our understanding that ImPetro Oil & Gas, LLC had received compulsory pooling Order R-21079 for its Case No. 20790 (the "Case") from the New Mexico Oil Conservation Division related to the Wolfcamp Unit (enclosed). As successor operator, TRO intends to re-open and amend the Case in accordance with its development plans.

EXHIBIT

Our title research has shown that the lease covering your interest in the Wolfcamp Unit expires soon and TRO believes it may be prevented from obtaining production or otherwise conducting required operations before the expiration date. Therefore, if you do not wish to participate in the Operation, TRO would like to offer the following terms:

- \$1,000 per net mineral acre for a two-year lease extension or
- \$2,500 per net mineral acre for a three-year lease extension.

The lease extension offer is subject to the approval of TRO's board and verification of title.

In the event you elect to participate in the proposed Wells, please execute the enclosed AFEs and return to me within 30 days. TRO is proposing to drill these wells under the terms of the AAPL Form 610-1989 Operating Agreement which will be provided after an election to participate is received. This Operating Agreement covers the W/2 of Sections 18 and 19, Township 25 South, Range 36 East, Lea County, New Mexico.

Additionally, TRO is open to discuss possible other deal structures related to your interest in the proposed Wells. If an agreement cannot be reached within 30 days of the date of this letter, TRO will apply to the New Mexico Oil Conservation Division to re-open the Case and compulsory pool your interest into a spacing unit for the proposed Wells to allow TRO to move forward with planning and drilling the Wells.

Should you have any questions regarding the above, please contact the undersigned.

Sincerely,

TAP ROCK OPERATING, LLC

Case No. 21340

AFFIDAVIT OF EMILY LANGE

I, being duly sworn on oath, state the following:

1. I am over the age of 18, and I have personal knowledge of the matters stated herein.
2. I am employed as a petroleum geologist for Tap Rock Operating, LLC ("Tap Rock"), and I am familiar with the subject applications and the geology involved.
3. This affidavit is submitted in connection with the filing by Tap Rock of the above-referenced compulsory pooling applications pursuant to 19.15.4.12.A(1) NMAC.
4. I have previously testified before the New Mexico Oil Conservation Division as an expert witness in petroleum geology matters. My credentials as a petroleum geologist have been accepted by the Division and made a matter of record.
 - a. I hold a Bachelor's degree in Geology from the University of Southern California, which I completed in 2012. I am currently working towards a Master's degree in Geology at Southern Methodist University.
 - b. I have been employed as a petroleum geologist since 2013. I have worked in New Mexico since 2015.

EXHIBIT

C

5. **Exhibit 8** is a Project Locator Map depicting the location of the Horizontal Spacing Unit ("HSU") within the Delaware Basin. Within Sections 18 & 19 of 25S 36E, are the Blue Marlin Fed Com 201H, 205H, 211H, 202H, 212H, and 215H wells (the "Wells").

6. **Exhibit 9** is a Gun Barrel Diagram showing the planned Wolfcamp horizontal spacing for the Wells. This diagram shows the projected development of the six Wolfcamp Wells spaced 880' away from the nearest well in the same zone. A nearby type log has been included (for log descriptions, see Exhibit 11 below) to show approximate depths and reservoir quality of the selected landing zones.

7. **Exhibit 10** is a Wolfcamp A Structure Map. This map shows the location of the W/2 Blue Marlin HSU outlined by the red box. The surface/bottom hole locations of the Wells are shown, zoomed in, to the right. The map is the top of the Wolfcamp A formation in sub-sea vertical depth. The contour intervals are 25 feet each. There is a monoclinical dip down to the southwest. The orientation of the Wells will each be approximately along strike. There are no horizontal wells in the direct vicinity that have targeted similar intervals. However, horizontal wells shown on the map are all Wolfcamp producers. The vertical wells controlling the structure map have the sub-sea vertical depth posted in maroon. The subsequent cross-section from A-A' is also identified to locate our closest control on the reservoir properties for the Wells. I do not observe any faulting, pinch-outs, or other geologic impediments or hazards to developing this targeted interval with a horizontal well.

8. **Exhibit 11** is a Wolfcamp Stratigraphic Cross Section (flattened on the Wolfcamp A surface). Wells 2 & 3 (moving left to right) have a triple combo log. Wells 1, 4, & 5 show only gamma ray and/or resistivity and are utilized here to show correlation of our target intervals across the W/2 Blue Marlin HSU. Track 1 has a gamma ray log with interpreted color fill for

lithology and scaled from 0 to 200 api units and a caliper log scaled from 0 to 16. For gamma ray, the blue colors indicate carbonate, yellow to orange are sandstone/siltstones, and the darker browns are shale facies. For caliper, higher values indicate irregularities in hole diameter. Track 2 has the deep resistivity log, scaled from 0.2 ohmm to 2000 ohmm. The blue shading cutoff is at 50 ohmm or less to help identify the more siliciclastic rocks. Track 3 is the porosity track and contains the red neutron porosity curve and the blue density porosity curve, both scaled from 30% to -10%. The pink shading on the neutron porosity curve highlights anything greater than 15% to identify zones with increased clay content. The green shading on the density porosity curve highlights anything greater than 10% porosity. This cutoff indicates the best rock properties for reservoir evaluation. The cross-section identifies the key tops used to evaluate reservoirs and landing targets for the Wells. Peach circles on the depth track of Well 3 show the landing target intervals for the Wells within in the green shaded box. The targeted reservoir has a thickness of approximately 825', but does thicken down to the southwest.

9. **Exhibit 12** is an Isopach Map of the Gross Wolfcamp interval. This map shows the location of the W/2 Blue Marlin HSU outlined by the red box. The surface/bottom hole locations of the Wells are shown, zoomed in, to the right. The anticipated gross thickness of the interval is ~825 feet throughout the HSU. The contour intervals are 25'. There are no horizontal wells that have targeted this interval in the direct vicinity, and all the horizontals shown on the map are landed in the Wolfcamp formation. The location of the previous cross-section from A-A' is also shown on this map.

10. Based on my geologic study of the area, I conclude the following:

- a. The horizontal spacing and proration unit is justified from a geologic standpoint.

- b. There are no structural impediments or faulting that will interfere with horizontal development.
 - c. Each quarter-quarter section in the unit will contribute more or less equally to production.
 - d. The preferred well orientation in this area is south-north. This is because the inferred orientation of the maximum horizontal stress is roughly northwest-southeast.
11. **Exhibit 13** shows a Simplified Wellbore Diagram for each of the Wells in the HSU and demonstrate that the first and last take points for each well will be standard.
12. The Exhibits to this Affidavit were prepared by me, or compiled from Tap Rock's company business records.
13. The granting of this Application is in the interests of conservation and the prevention of waste.
14. The foregoing is correct and complete to the best of my knowledge and belief.
