**Subject:** [EXT] Methane Rule

I am unable to connect to TAKE ACTIO. Perhaps I am too late. We do not want to give our comments orally. We just want to get this message to the right person/people/ So we are sending our comments to the only emails we have available to us. We are ludites.

To whom it may concern: The oil and gas sector inn NM generates 53% of all greenhouse gas emissions in the state, more than twice the amount previously estimated. This is to math savvy people more than any other single source, as well as all of them put together. Time to put a stop to this. You know what I am talking about so I won't go into the weeds of truth. All you need to do is: Please reduce methane emissions so we/you can prolong life on earth and keep it beautiful, like you have been gifted with.

As you enjoy your gift make it a sure thing for your grandkids.

Thank you,

Therese & David Patton
