E. Facility Program: LOGOS relocated the East Rosa CDP from Section 28, T31N, R04W to Section 30, T31N, R04W in Rio Arriba County, NM. Due to contractual changes, in July 2017, WPX, the former Rosa Unit operator, reconnected the pipeline to Williams with a temporary, 1 mile, 4" suction

line which resulted in a disruption to pigging operations and production loss. LOGOS relocated the existing rental compressor and other surface equipment to an optimal location in order to reduce suction pressure, optimize the currently under-utilized compression and restoring pigging and hydraulic efficiency. These improvements resulted in increased production and will reduce potential corrosion and failures in the line.

F. Plugging & Abandonment Program: LOGOS did not plug and abandon any Rosa Unit projects in 2021.

III. 2022 PLAN OF DEVELOPMENT AND OPERATIONS

A summary of key activities planned for 2022 includes:

A. Drilling Program: LOGOS plans to drill and complete between 8 and 12 horizontal Mancos wells within the Rosa Unit in accordance with the approved permits and Surface Use Plans. The list of potential wells and the pads where they are located is:

Water for completion of these wells is estimated to be ~75 acre feet per well, will be obtained via surface line transport from the Navajo Reservoir, stored on location in lake tank(s) and is secured through leased senior water rights backed by storage and will be subject to all applicable approvals and permits.

B. Workovers / Recompletion Program: LOGOS plans to workover the following wells in 2022 as logistics and commodity pricing allows. Other wells may be added as they are identified throughout the year. LOGOS will likely be evaluating downhole commingling for a minimum of 5 MV/DK wells which will be identified later in the year.

C. Facility Program: LOGOS plans to relocate the 180A lateral compressor, which is currently sitting on Pad 5, Section 9 T31N R6W in San Juan County, NM. With the proposed drilling activity on pad 5, it is necessary to relocate the lateral compressor to be just adjacent to pad 5, near the Harvest pipeline ROW. This will allow for safer operations on the pad during drilling and completion activity. This will be a permanent relocation.

D. Plugging & Abandonment Program: LOGOS does not anticipate plugging and abandoning any wells in the Rosa Unit in 2022. LOGOS will evaluate and implement P&A projects should they arise. Plans may change depending on specific well conditions and commodity pricing.
