### Summary of 2021 Operations

2021 operations and production of Unitized Substances were conducted as to the most economical and efficient recovery of such substances to prevent waste. CTE also took appropriate measures to prevent drainage of Unitized Substances from the committed tracts by wells on land not subject to the applicable Unit Agreement.

2021 operations did not include the drilling of any new unit wells, recompletions of existing wells to the Unitized Formation, temporary abandonment of any unit wells, or plug and abandonment of any unit wells.

Attached to and made part of that certain CTE 2022 Plan of Development/Operations letter dated February 24, 2022

CTE hereby provides notification of no scheduled plans for 2022. Yearly plans are subject to change based on economics or operational need to optimize recovery of Unitized Substances and/or plug and abandon any unit wells that become uneconomic to repair.
