RE: 2022 PLAN OF DEVELOPMENT/OPERATIONS  
NORTH VACUUM ABO EAST UNIT  
LEA COUNTY, NEW MEXICO

Ladies and Gentlemen,

Pursuant to Article 12 of the Unit Agreement for the Development and Operation of the North Vacuum Abo East Unit, dated October 1, 1977, Cross Timbers Energy, LLC ("CTE"), as Unit Operator, is hereby providing notification for the Plan of Further Development and Operation for the North Vacuum Abo East Unit ("NVAEU") in 2022.

CTE has and will make every reasonable effort to optimize recovery of Unitized Substances, prevent waste and conserve natural resources, and ensure Unitized Substances are not drained by any offset wells outside of the unit boundary.

For any wells that become uneconomic to repair will be plugged and abandoned in accordance with the conservation laws of the State of New Mexico, to the valid rules, regulations and orders of the Commissioner and the Commission and to all other applicable federal, state, and municipal laws, rules, regulations, and orders.

In accordance with the mentioned Unit Agreement provisions, please provide your consent and approval by executing and returning one copy of the enclosed signature page to CTE at the address below or to CHicks@mspartners.com.

Please contact the undersigned for any questions regarding this letter at (817) 334-7829 or at CHicks@mspartners.com.

Sincerely,

Caylee Hicks

### Summary of 2021 Operations

2021 operations and production of Unitized Substances were conducted as to the most economical and efficient recovery of such substances to prevent waste. CTE also took appropriate measures to prevent drainage of Unitized Substances from the committed tracts by wells on land not subject to the applicable Unit Agreement.

2021 operations did not include the drilling of any new unit wells, recompletions of existing wells to the Unitized Formation, temporary abandonment of any unit wells, or plug and abandonment of any unit wells.

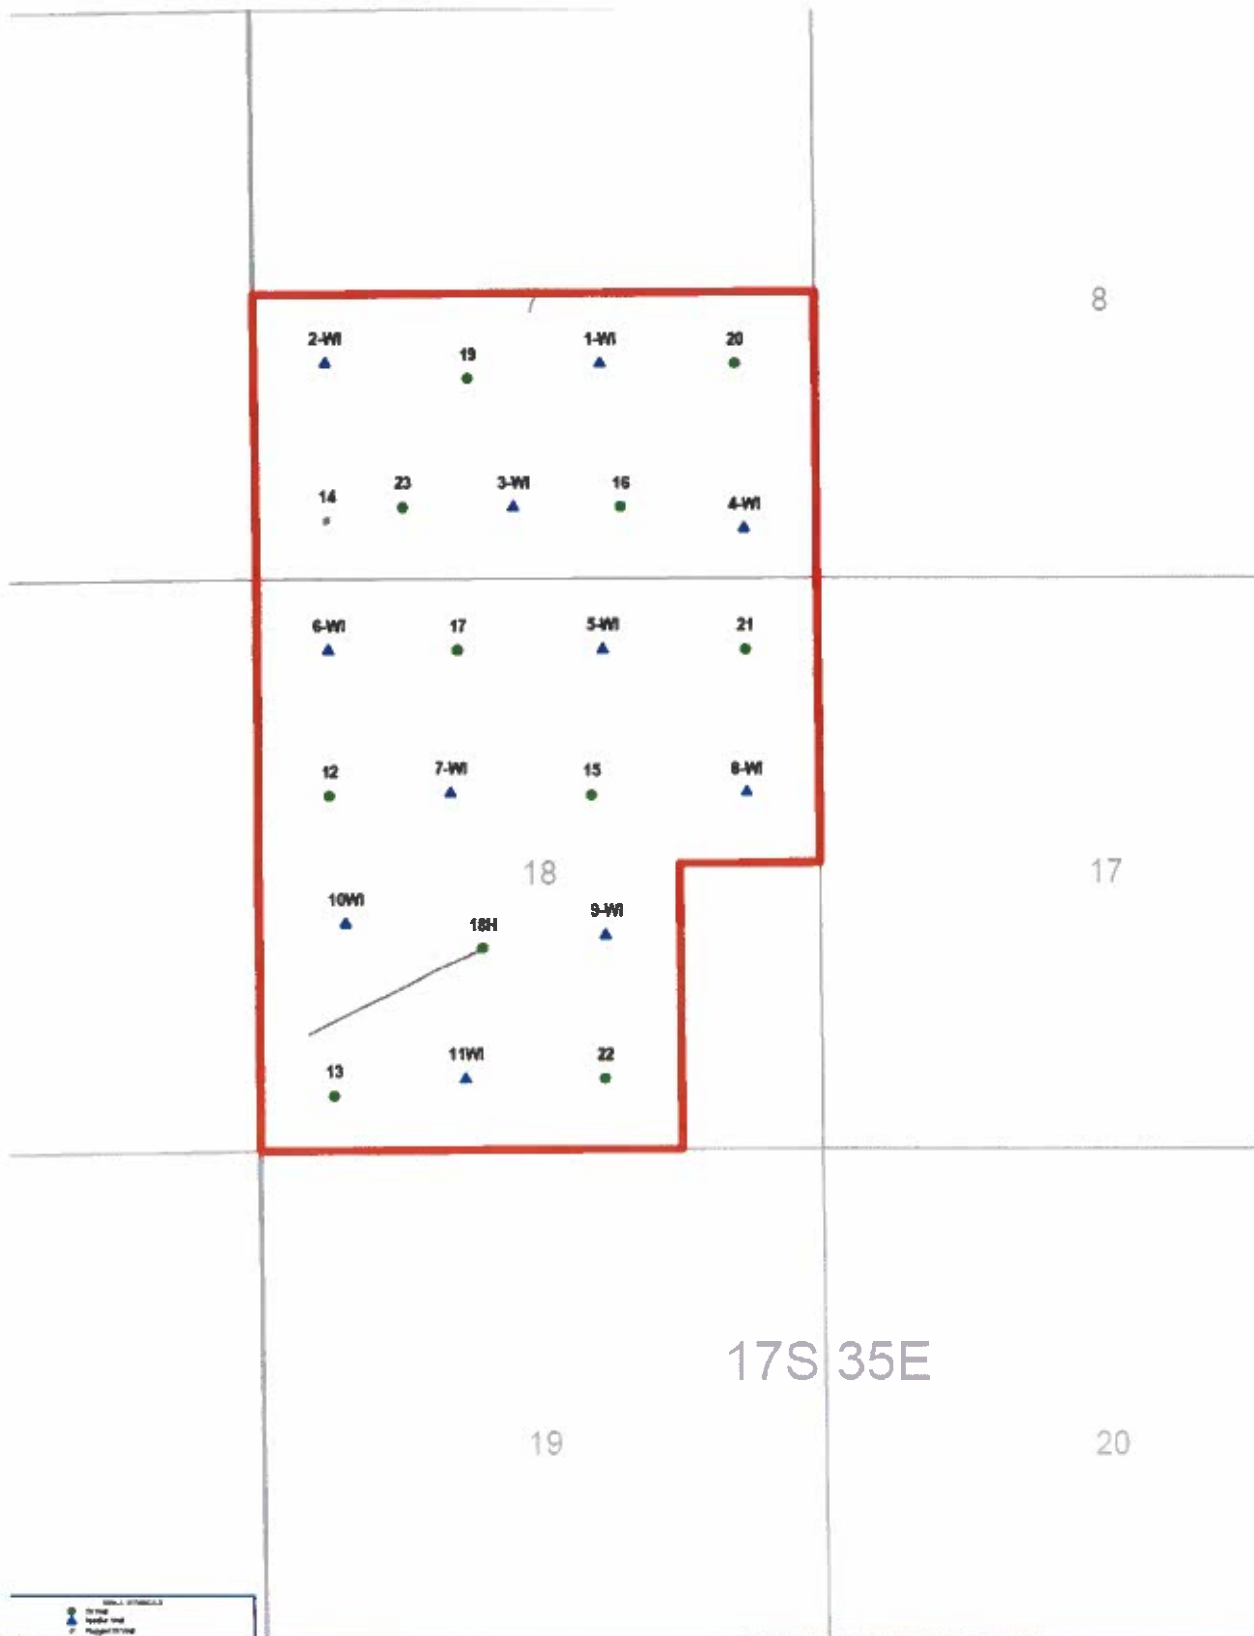

### Proposed 2022 Operations

CTE hereby provides notification of no scheduled plans for 2022. Yearly plans are subject to change based on economics or operational need to optimize recovery of Unitized Substances and/or plug and abandon any unit wells that become uneconomic to repair.
