STATEMENT OF THE CASE

COG Operating LLC (COG) is the applicant in two cases. In Case No. 14558, Marbob Energy Corporation filed the application shortly before it was acquired by COG. In Case No. 14458 COG is seeking an Order to expand the vertical limits of the existing Burch-Keely Unit a few hundred feet to the 5,000 foot mark, which is also the extent of COG's ownership interest. During the hearing, the Oil Conservation Division examiners raised the issue that if the Grayburg Jackson Pool was not extended to match the unit, then COG would need to obtain numerous commingling orders in order to produce from a well perforations in both the then-existing unit and the expansion area. That process would be inefficient for both COG as the operator and OCD in processing numerous requests to commingle production. Therefore, in case No. 14577 COG is seeking an Order to expand the vertical limits of the Grayburg Jackson Pool within the Burch Keely Unit to the same depth, 5,000 feet. In both cases the OCD issued the requested Orders. ConocoPhillips Company appealed both orders to the Commission in a de novo proceeding.
