Pre Hearing Statement

RECEIVED OOD

2011 AUG 15 P 1:35

Brad D. Bassore d/b/a Basin Petroleum Company
Pro se

1. The pooling orders that applicant requests concerns two newly drilled wells, the Parkway 23 2-H and the Parkway 23 3-H. Section 23-19S- 29 E Eddy County, NM. The State leases covering these wells are subject to a Joint Operating Agreement. I participated and consented to the drilling of the Parkway 23 2-H. I did not participate and went non consent on the Parkway 23 3-H and the Parkway 23 4-H.
It is my understanding that EOG Resources is producing these wells along with the Parkway 23 4-H well into a Central Tank Battery. I have requested an engineering schematic of the Central Tank Battery and information concerning location of the metering at this Central Tank Battery which I have not received . I request that before issuing any pooling orders the Commission ensure that EOG Resources is in compliance with Section 19.15.18.15 Automatic Custody Transfer Equipment concerning Central Tank Batteries to protect my correlative rights.
2. Witnesses: None
3. Time Needed : 15 Minutes
4. I offer no other objections to Applicants request for a pooling order other than the above stated concern and otherwise support their application to operate the above the referenced wells and pool the lands noted in their applications.
5. I received notification of the Hearing by mail on Fri. Aug 12 and was unaware of the the requirement to make a written appearance until Sat, Aug 13. at which time I prepared this answer and delivered to Applicant's attorney by e-mail. It will be filed with the Commission on Mon. Aug. 15.
