STATEMENT OF THE CASE

APPLICANT

Cimarex Energy Co. proposes to drill four vertical Glorieta-Yeso wells in the SE/4 of Section 6, Township 19 South, Range 26 East, NMPM, as follows:

Case 14703: Cimarex Energy Co. seeks an order pooling all mineral interests from the surface to the base of the Glorieta-Yeso formation underlying the NW/4SE/4 of Section 6, Township 19 South, Range 26 East, NMPM, to form a standard 40-acre oil spacing and proration unit for any and all formations or pools developed on 40-acre spacing within that vertical extent. The unit will be dedicated to the Colorado 6 Fee Well No. 1, to be drilled at an orthodox location. Also to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, as well as actual operating costs and charges for supervision, designation of applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well.

Case 14704: Cimarex Energy Co. seeks an order pooling all mineral interests from the surface to the base of the Glorieta-Yeso formation underlying the NE/4SE/4 of Section 6, Township 19 South, Range 26 East, NMPM, to form a standard 40-acre oil spacing and proration unit for any and all formations or pools developed on 40-acre spacing within that vertical extent. The unit will be dedicated to the Colorado 6 Fee Well No. 2, to be drilled at an orthodox location. Also to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, as well as actual operating costs and charges for supervision, designation of applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well.

Case 14705: Cimarex Energy Co. seeks an order pooling all mineral interests from the surface to the base of the Glorieta-Yeso formation underlying the SW/4SE/4 of Section 6, Township 19 South, Range 26 East, NMPM, to form a standard 40-acre oil spacing and

proration unit for any and all formations or pools developed on 40-acre spacing within that vertical extent. The unit will be dedicated to the Colorado 6 Fee Well No. 5, to be drilled at an orthodox location. Also to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, as well as actual operating costs and charges for supervision, designation of applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well.

Case 14698: Applicant seeks an order pooling all mineral interests from the surface to the base of the Glorieta-Yeso formation underlying the SE/4SE/4 of Section 6, Township 19 South, Range 26 East, NMPM, to form a standard 40-acre oil spacing and proration unit for any and all formations or pools developed on 40-acre spacing within that vertical extent. The unit will be dedicated to the Kansas 6 Fee Well No. 1, to be drilled at an orthodox location. Also to be considered will be the cost of drilling and completing the well and the allocation of the cost thereof, as well as actual operating costs and charges for supervision, designation of applicant as operator of the well, and a 200% charge for the risk involved in drilling and completing the well.

COG Operating LLC has proposed two horizontal wells crossing the E/2E/2 and W/2E/2 of Section 6. Cimarex Energy Co. will present evidence showing that (1) it has made a good faith effort to obtain voluntary pooling, (2) it has a majority working interest in its well units, and (3) vertical wells are more economic and obtain better results than horizontal wells.

OPPONENT

PROPOSED EVIDENCE

APPLICANT

<u>WITNESSES</u>	<u>EST. TIME</u>	<u>EXHIBITS</u>
Hayden Tresner (landman)	20 min.	Approx. 6
Meera Ramoutar (geologist)	20 min.	Approx. 10
Floyd Hammond (engineer)	20 min.	Approx. 15
