**Subject:** Full disclosure of chemicals used in fracking

RECEIVED OCD  
2011 NOV 16 P 2:04

Dear Ms. Davidson:

I have been following the fracking issue for quite some time. The oil and gas companies have been using the excuse that it would be detrimental to their business if they disclosed the chemicals involved thus giving their secrets away to their competitors. It has become common knowledge that the real reason they do not disclose the chemicals is because they are environmentally hazardous and toxic to living things. As a taxpaying citizen I demand full disclosure in matters that concern my health and the environment I live in. Sincerely, Guy Le Sage
