**Subject:** Case No. 14803 Application of Apache Corporation to Amend Order R-13176

Dear Jim

One of the wells in the Area of Review for the Blankenship #2 injection well, which is the subject of this Application, is the Howse C #1 (API No. -025-22165). Per Division records, it appears this well was plugged after the original injection permit Order R-13176 was issued, or at least after the hearing that resulted in that order.

You filed a new C-108 at the hearing of the present application, but that new C-108 does not include a wellbore diagram for the Howse C#1 to show that it is properly plugged, as required by the form.

We accordingly ask that Apache supplement the record in this case by furnishing us a wellbore diagram showing the plugging of the Howse C#1.

Thanks  
David K. Brooks
