APPLICANT'S STATEMENT OF CASE

The Section 1 competing well proposals. In Case Nos. 14791-14793, COG seeks an order: (1) creating non-standard 160-acre spacing/proration units and project areas comprised of the E/2 W/2, the W/2 W/2, and the E/2 E/2 of Section 1, Township 19 South, Range 25 East, NMPM, Eddy County, New Mexico; and (2) pooling all mineral interests in the Glorieta-Yeso formation underlying these 160-acre project areas for the purpose of drilling three horizontal wells. In contrast to COG's horizontal development plans, in Case Nos. 14770-14772 and 14781, Cimarex seeks an order pooling all mineral interests in the equivalent of eight 40-acre oil spacing and proration units for the purpose of developing the Glorieta-Yeso formation underlying this area with at least eight vertical wells.

The Section 31 competing well proposals. In Case Nos. 14794-14795, COG seeks an order (1) creating two non-standard 160-acre spacing/proration units and project areas comprised of the W/2 W/2 and the E/2 E/2 of Section 31, Township 18 South, Range 26 East, NMPM, Eddy County, New Mexico; and (2) pooling all mineral interests in the Glorieta-Yeso formation underlying these 160-acre project areas for the purpose of drilling two horizontal wells. In contrast to COG's horizontal development plans, in Case Nos. 14767-14769, Cimarex seeks an order pooling all mineral interests in the equivalent of three 40-acre oil spacing and proration units for the purpose of developing the Glorieta-Yeso formation underlying this area with at least three vertical wells.

The Division is asked to determine which of these competing development plans are in the best interests of the affected working interest, and in the best interests of conservation and the prevention of waste.
