**Subject:** The Pit Rule

Dear Ms. Davidson,

I am writing to encourage the Commission to keep the safeguards in place, via The Pit Rule, which was hard fought for to protect our beautiful land and water. The Pit Rule has resulted in no groundwater contamination from the oil industry. Prior to the Pit Rule there were at least 400 cases of groundwater contamination. There is no reason to grant less restrictions to the oil industry. This turns back the clock to irresponsibility by the industry. Please do not cave into their request to reduce restrictions.

Thank you,

Glenda Fletcher  
Velarde, NM
