Re:	Mesa Queen, Lea Co., NM	CC:	

Comments: Attached is the inactive well report spreadsheet you sent me with Xeric's proposed action on each well. I am faxing these to you as all I ever had was a hard copy of the spreadsheet since it was e-mailed to another e-mail address up here before I got mine. Consequently I hope you can read the comments I have penned in. I did not put down dates on most of the proposed actions, but we will try to get to all the wells within the next year. We plan to immediately return wells to production that need minimal remedial work. On the wells that we are either going to continue TA status or perform mechanical integrity tests on, we will work them on a field basis. We will be filing sundry notices on these and once approved we will start the work. On the wells we are going to P & A, we already have approved C-103's on the Mesa Queen wells and should have them completed in the next 60 to 90 days as the pluggers get to them. We will file our C-103's for intent to P & A on the others in the near future.

Thank you for your patience in this matter and should you have any question or need anything else, please feel free to contact me.
