Subject: New Mexico inactive well report

I am not going to be able to get the report to you today on the inactive wells as I had hoped I would. A combination of sickness, holidays and weather have slowed our progress. We have done everything but our physical well by well field inspection, which we will do Monday, weather permitting (that's how weather fits into this). Once this is done, we should have the report ready in a day or two. So by this next Friday, December 7, 2001 for sure! To date we have done a detailed review and study of each well and their future utility. We have reviewed the BLM files as well as the files at the Hobbs NMOCD office and have completed our files with this information where same was lacking. Consequently we fill the report we will submit will be accurate and something we should be able to implement.

Thank you for your continued patience and understanding. Please contact me should you have any questions or need anything else.
