June 3,, 2014

Hal J Rasmussen Operating Inc.
223 W Wall Street, Suite 600
Midland, Texas 79701

RESPONSE REQUIRED BY June 19, 2014

Dear Operator:

According to Oil Conversation Division (OCD) records, you are the operator of record for the wells listed below:

| | |
|-----------------|--------------|
| Amoco Stone #1 | 30-025-27936 |
| State E #22 | 30-025-02572 |
| Wilson State #4 | 30-025-02578 |

According to production records these wells are producing **gas** only. The wells are classified as **oil wells**. **SHUT IN WELLS IMMEDIATELY**. Submit OCD District 1 Hobbs Office the following: C-102 showing the plat for Standard Proration Unit of 160 acres and a completed C-104. When forms have been received and approved and only with **APPROVAL** can the wells can be returned to production.

OCD rules require wells that have been inactive for more than one year plus ninety days to be plugged and abandoned, placed on approved temporary abandonment status, or returned to active status (Rule 19.15.25.8 NMAC). Please return the well(s) to compliance as soon as possible. If you are taking action to return the well(s) to compliance in the immediate future, please contact Daniel Sanchez, OCD Compliance & Enforcement Manager, at 505-476-3493 or Daniel.sanchez@state.nm.us. You may be able to avoid enforcement action.

| Well Name and # | API # | Months since last production reported |
|-------------------|--------------|---------------------------------------|
| Amoco Stone #1 | 30-025-27936 | 94 |
| Gecko 27 State #1 | 30-025-33021 | 94 |
| Reed Estate #1 | 30-025-07258 | 98 |
| State B #12 | 30-025-02541 | 59 |

If the OCD does not hear from you by June 19, 2014, the OCD will file applications for hearing to seek plugging orders for state or fee wells out of compliance with Rule 19.15.25.8, NMAC. The OCD will seek an order requiring the operator to plug the well(s) by a certain date and authorizing the OCD to plug the well and the operator will forfeit any available financial assurance if the operator fails to comply.

June 3, 2014

Page 2

If the well is not covered by a financial assurance or if the financial assurance is not sufficient to cover the OCD's plugging costs, the OCD may bring suit against the operator for indemnification. NMSA 1978, Section 70-2-14(E).

When well(s) have been plugged and abandoned, the operator shall as soon as practical, but no later than one year from plug date: Install marker, remove anchors, level location, and remove all surplus or junk equipment. Submit C-103 Subsequent for Plugging and Abandonment to initiate inspection for release. Listed below is a well that has far exceeded the 12 months.

| <u>Well Name and #</u> | <u>API #</u> | |
|------------------------|--------------|--------------------|
| State A #2 | 30-025-08467 | Plugged 12/28/2008 |

As operator you must take action to prevent future releases/spills at the **Reed Estate #1**. On May 21, 2014 a release was reported to the OCD District 1 office. This is the second release of this nature at this site. Previously, January 20, 2011 a similar release was reported. At this time, as the operator of record, you must take the necessary action to plug and abandon this well bore. Submit C-103 intent for approval to the OCD District 1, Hobbs, NM 88240. To date three (3) letters have been sent out requesting the well be returned to production or plugged and abandoned. This is your **FINAL NOTICE** to take action to plug and abandon this well.

Please contact myself or Daniel Sanchez 505-476-3493 if you have any questions concerning this issue.

Sincerely,

Maxey G. Brown
District 1 Supervisor, 575-393-6161 ext. 102

Good morning Mr. Jobe,

I hope that these weeks have found you well Sir. I am contacting you to obtain some updates regarding the Reed Estate #1 (API- 30-025-07285) that we discussed some weeks ago. I visited the site yesterday as part of continuing monitoring efforts as per office guidelines. The site looked, to be honest, untouched. With the recent rain events the actual coverage by the oil water mixture has expanded. There is a point on the north side between where the old heater-treater and tank were placed that the has now flowed and is at the fence line. One more rain and this oil will flow down that gradient and breach the fence line entering an area where cattle roam frequently (evidenced by fresh deposits).

Attached are pictures from yesterday's visit indicating the expansion of the standing oil-water.

In addition, State of New Mexico Oil and Gas regulations state that a C-141 form be filed within 15 days of a release event. The even at this site occurred sometime either the 21 or 22 as on the May 22 we made our initial visit. It is now 21 days past the event, and your company is now delinquent in filing the form. The C-141 form can be found here-

<http://www.emnrd.state.nm.us/OCD/forms.html>

Please contact me at your earliest opportunity (I left a voicemail yesterday afternoon covering these details as well).

Mahalo for your cooperation Sir, I look forward to working with you to resolve these issues in an expedited manner.
