Re: Letter of Support  
Compulsory Pooling of a Sub-Set of Formation  
Branex-COG Federal Com 15H  
T17S-R32E, Section 9, N/2S/2  
Lea County, NM

Dear Operator:

I write this letter in support of COG Operating LLC's ("COG") application for a non-standard spacing unit and proration unit and compulsory pooling for its proposed Branex-COG Federal Com 15H. COG seeks to pool a portion of the West Maljamar Yeso Pool from the top of the Paddock to the base of the Blinebry and to create a non-standard spacing unit for the N/2S/2 of section 9, Township 17 South, Range 32 East, NMPM, Lea County, New Mexico.

Este Ltd. owns a working interest below the base of the Blinebry. The proposed well is not located within my working interest ownership. COG provided notice of its application on May 20, 2016, advising that as a vertical offset working interest owner in the Yeso formation that my interest could be affected. After further review of my records, I determined that my interest would not be affected and I took no further action.

Este Ltd. is also the owner of depth severed interests within particular formations or pools throughout New Mexico and will be affected by the NMOCD's current position with regards to denial of pooling sub-sets of a formation. Allowing pooling of subsets of formations or pools, among other things, will protect correlative rights, prevent waste and inhibit the stranding of reserves.

Este Ltd. is in support of COG's development of the Branex-COG Federal Com 15H well as discussed in Case No.15499. Este Ltd understands this letter of support will be used at an upcoming hearing in front of the NMOCC.

Respectfully,

  
Charles R. Qualia, Owner
