**APPLICANT'S STATEMENT OF CASE**

COG Operating LLC seeks to amend Order R-13757 to (1) pool the interests of additional mineral owners under the terms of Order R-13757; and (2) pool the San Andres formation within the Unit within the Penasco Draw-San Andres-Yeso (Associated) Pool (50270). Division Order R-13757, entered on October 4, 2013, created a 159.67-acre, more or less, non-standard spacing and proration unit comprised of the E/2 W/2 of Section 6, Township 19 South, Range 26 East, NMPM in Eddy County, New Mexico, and pooled the mineral interests underlying said unit in the Yeso formation (Penasco Draw-San Andres-Yeso (Associated) Pool

(50270)). The non-standard spacing and proration unit was dedicated to COG's **Arabian 6 Fee Well No. 6H Well** (API No. 30-015-39625), which was drilled from a surface location 183 feet from the South line and 2,267 feet from the West line (Unit N) of Section 6, to a standard bottomhole location 330 feet from the North line and 2,177 feet from the West line (Lot 3) of Section 6.

Since the entry of Order R-13757, certain leases have expired and a Joint Operating Agreement terminated, resulting in mineral interest owners that are no longer contractually committed to the well. COG now seeks to amend Order R-13757 to include these additional interests under the terms of that pooling order. COG also seeks to pool the San Andres formation within the Unit, in addition to the Yeso formation, within the Penasco Draw-San Andres-Yeso (Associated) Pool (50270).
