APPLICANT'S STATEMENT OF CASE

COG Operating LLC seeks to amend Order R-13808 to (1) pool additional uncommitted interest owners under the terms of Order R-13808; and (2) pool the Atoka and Glorieta formations within the Unit within the Atoka Glorieta-Yeso Pool (3250). Division Order R-13808, entered on March 11, 2014, created a 160-acre non-standard spacing and proration unit comprised of the W/2 W/2 of Section 6, Township 19 South, Range 26 East, NMPM in Eddy County, New Mexico, and pooled the mineral interests underlying said unit in the Atoka Glorieta-Yeso Pool (3250). The non-standard spacing and proration unit was dedicated to COG's **Arabian 6 Fee Well No. 10H Well** (API No. 30-015-42004), which was drilled from a

surface location 150 feet from the South line and 210 feet from the West line (Lot 4) of Section 31, to a standard bottomhole location 330 feet from the South line and 530 feet from the West line (Lot 7) of Section 6.

Since the entry of Order R-13808, certain leases have expired and a Joint Operating Agreement terminated, resulting in mineral interest owners that are no longer contractually committed to the well. COG now seeks to amend Order R-13808 to include these additional interests under the terms of that pooling order. COG also seeks to pool the Atoka and Glorieta formations within the Unit, in addition to the Yeso formation, within the Atoka Glorieta-Yeso Pool.
