Subject: OCD Case No. 15072; Application of Energen Resources Corporation to Amend Compulsory Pooling Order, Etc.

Good morning gentlemen:

I have been asked to look at this case which was heard by Richard Ezeanyim on April 3, 2014, and on which no order has been issued. Probably because the issues are exclusively legal, and not engineering, issues, the case has fallen through the cracks.

Because it has been so long under advisement, I would like to be advised if the parties positions have changes in any way, or if there have been any developments in the court case between them, before I finalize an order.

Sincerely

David Brooks
