

**STATE OF NEW MEXICO
ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

**IN THE MATTER OF THE HEARING
CALLED BY THE OIL CONSERVATION
DIVISION FOR THE PURPOSE OF
CONSIDERING:**

**CASE NO. 15433 (Re-Opened)
ORDER NO. R-14140-A**

**APPLICATION OF MATADOR PRODUCTION COMPANY TO RE-OPEN CASE
NO. 15433 TO POOL THE INTERESTS OF ADDITIONAL MINERAL INTEREST
OWNERS UNDER THE TERMS OF COMPULSORY POOLING ORDER NO. R-
14140, LEA COUNTY, NEW MEXICO.**

ORDER OF THE DIVISION

BY THE DIVISION:

This case came on for hearing at 8:15 a.m. on August 4, 2016, at Santa Fe, New Mexico, before Examiner William V. Jones.

NOW, on this 18th day of August, 2016, the Division Director, having considered the testimony, the record and the recommendations of the Examiner,

FINDS THAT:

- (1) Due public notice has been given, and the Division has jurisdiction of this case and the subject matter.
- (2) The Division, by Order No. R-14140 issued in Case No. 15433 on March 30, 2016, approved the compulsory pooling of all uncommitted interests within a Bone Spring oil spacing and proration unit (the "Unit") consisting of the W/2 E/2 of Section 32, Township 18 South, Range 33 East, NMPM, Lea County New Mexico. The Unit is dedicated to the Eland State 32 18 33 RN Well No. 123H (API No. 30-025-42977), a horizontal well to be drilled to test the Bone Spring formation.
- (3) The well was planned for drilling from a standard surface location in Unit B to a standard bottomhole location in Unit O, both within Section 32. Matador Production Company (the "Applicant") has changed the well direction within the same Unit (W/2 E/2 of Section 32) and now intends to drill the well from South to North.

(4) Applicant appeared at hearing requesting an amended Order No. R-14140 to reflect the new surface and bottomhole locations. In addition, at the hearing, applicant noted the well is a "State Com" well with a different well name and that Nearburg Exploration Company L.L.C. and Nearburg Producing Company ("Nearburg") are no longer subject to pooling.

(5) After the change of plans, the Unit will be dedicated to Applicant's Eland 32 18 33 RN State Com Well No. 123H (API No. 30-025-42977), (the "Proposed Well") a horizontal well to be drilled from a surface location 465 feet from the South line and 1196 feet from the East line (Unit P) of Section 32 to a bottomhole location 240 feet from the North line and 1870 feet from the East line (Unit B) of Section 32. The completed interval will be orthodox.

(6) The well completion is within the Corbin; Bone Spring, South Pool (Pool code 13160) and subject to Division Rule 19.15.15.9A NMAC, which provides for 330-foot setbacks from the unit boundaries and standard 40-acre units each comprising a governmental quarter-quarter section.

(7) Applicant appeared through counsel and presented testimony and proof of notice to all interest owners subject to pooling proceedings as affected parties of the proposed compulsory pooling within the Unit. To ensure notice was properly done, Applicant published notice in a newspaper of general circulation in Lea County.

(8) No other party entered an appearance or otherwise opposed this application.

The Division concludes as follows:

(9) Two or more separately owned tracts are embraced within the Unit, and/or there are royalty interests and/or undivided interests in oil and gas minerals in one or more tracts included in the Unit that are separately owned.

(10) Applicant is owner of an oil and gas working interest within the Unit. Applicant has the right to drill and proposes to drill the proposed well to a common source of supply within the Unit at the proposed location.

(11) There are interest owners in the Unit that have not agreed to pool their interests.

(12) To avoid the drilling of unnecessary wells, protect correlative rights, prevent waste and afford to the owner of each interest in the Unit the opportunity to recover or receive without unnecessary expense a just and fair share of hydrocarbons, this application should be approved by pooling all uncommitted interests, whatever they may be, in the oil and gas within the Unit.

(13) Matador Production Company should be designated the operator of the proposed well and the Unit.

(14) Any pooled working interest owner who does not pay its share of estimated well costs should have withheld from production its share of reasonable well costs plus an additional 200% thereof as a reasonable charge for the risk involved in drilling the proposed well.

(15) Reasonable charges for supervision (combined fixed rates) should be fixed at \$7000 per month while drilling and \$700 per month while producing, provided that these rates should be adjusted annually pursuant to Section III.1.A.3. of the COPAS form titled "*Accounting Procedure-Joint Operations.*"

IT IS THEREFORE ORDERED THAT:

(1) Pursuant to the application of Matador Production Company, Division Order No. R-14140 is amended as follows: All uncommitted interests, whatever they may be, in the oil and gas in the Bone Spring formation in an oil spacing and proration unit (the "Unit") within the Corbin; Bone Spring, South Pool (Pool code 13160), underlying the W/2 E/2 of Section 32, Township 18 South, Range 33 East, NMPM, Lea County New Mexico, are hereby pooled.

(2) The Unit is dedicated to the Eland 32 18 33 RN State Com Well No. 123H (the "proposed well"; API No. 30-025-42977), a horizontal well to be drilled from a surface location 465 feet from the South line and 1196 feet from the East line (Unit P), to a bottomhole location 240 feet from the North line and 1870 feet from the East line (Unit B), both in Section 32. The completed interval will be orthodox.

(3) The operator of the Unit shall commence drilling the proposed well on or before August 31, 2017, and shall thereafter continue drilling that well with due diligence to test the Bone Spring formation.

(4) In the event the operator does not commence drilling the proposed well on or before August 31, 2017, Ordering Paragraph (1) shall no longer apply, unless the operator obtains a time extension from the Division Director for good cause demonstrated by satisfactory evidence. If the proposed well is not completed in all of the standard spacing units included in the proposed project area (or Unit) then the operator shall apply to the Division for an amendment to this order to contract the Unit so that it includes only those standard spacing units in which the well is completed.

(5) Should the proposed well not be drilled and completed within 120 days after commencement thereof, then Ordering Paragraph (1) shall be of no further effect, and the Unit and project area created by this order shall terminate, unless operator appears before the Division Director and obtains an extension of the time for completion of the proposed well for good cause shown by satisfactory evidence.

(6) Upon final plugging and abandonment of the proposed well and any other well drilled on the Unit pursuant to Division Rule 19.15.13.9 NMAC, the pooled Unit

created by this order shall terminate, unless this Order has been amended to authorize further operations.

(7) Matador Production Company (OGRID 228937) is hereby designated the operator of the well and the Unit.

(8) After pooling, uncommitted working interest owners are referred to as pooled working interest owners. ("Pooled working interest owners" are owners of working interests in the Unit, including unleased mineral interests, who are not parties to an operating agreement governing the Unit.) After the effective date of this order, the operator shall furnish the Division and each known pooled working interest owner in the Unit an itemized schedule of estimated costs of drilling, completing and equipping the proposed well ("well costs").

(9) Within 30 days from the date the schedule of estimated well costs is furnished, any pooled working interest owner shall have the right to pay its share of estimated well costs to the operator in lieu of paying its share of reasonable well costs out of production as hereinafter provided, and any such owner who pays its share of estimated well costs as provided above shall remain liable for operating costs but shall not be liable for risk charges. Pooled working interest owners who elect not to pay their share of estimated well costs as provided in this paragraph shall thereafter be referred to as "non-consenting working interest owners."

(10) The operator shall furnish the Division and each known pooled working interest owner (including non-consenting working interest owners) an itemized schedule of actual well costs within 90 days following completion of the proposed well. If no objection to the actual well costs is received by the Division, and the Division has not objected, within 45 days following receipt of the schedule, the actual well costs shall be deemed to be the reasonable well costs. If there is an objection to actual well costs within the 45-day period, the Division will determine reasonable well costs after public notice and hearing.

(11) Within 60 days following determination of reasonable well costs, any pooled working interest owner who has paid its share of estimated costs in advance as provided above shall pay to the operator its share of the amount that reasonable well costs exceed estimated well costs and shall receive from the operator the amount, if any, that the estimated well costs it has paid exceed its share of reasonable well costs.

(12) The operator is hereby authorized to withhold the following costs and charges from production from each well:

- (a) The proportionate share of reasonable well costs attributable to each non-consenting working interest owner; and

(b) As a charge for the risk involved in drilling the well, 200% of the above costs.

(13) The operator shall distribute the costs and charges withheld from production, proportionately, to the parties who advanced the well costs.

(14) Reasonable charges for supervision (combined fixed rates) for the well are hereby fixed at \$7000 per month while drilling and \$700 per month while producing, provided that these rates shall be adjusted annually pursuant to Section III.1.A.3. of the COPAS form titled "*Accounting Procedure-Joint Operations.*" The operator is authorized to withhold from production the proportionate share of both the supervision charges and the actual expenditures required for operating the well, not in excess of what are reasonable, attributable to pooled working interest owners.

(15) Except as provided in Paragraphs (12) and (14) above, all proceeds from production from the proposed well that are not disbursed for any reason shall be held for the account of the person or persons entitled thereto pursuant to the Oil and Gas Proceeds Payment Act (NMSA 1978 Sections 70-10-1 through 70-10-6, as amended). If not disbursed, such proceeds shall be turned over to the appropriate authority as and when required by the Uniform Unclaimed Property Act (NMSA 1978 Sections 7-8A-1 through 7-8A-31, as amended).

(16) Any unleased mineral interests shall be considered a seven-eighths (7/8) working interest and a one-eighth (1/8) royalty interest for the purpose of allocating costs and charges under this Order. Any well costs or charges that are to be paid out of production shall be withheld only from the working interests' share of production, and no costs or charges shall be withheld from production attributable to royalty interests.

(17) Should all the parties to this compulsory pooling order reach voluntary agreement subsequent to entry of this order, this order shall thereafter be of no further effect.

(18) The operator of the well and the Unit shall notify the Division in writing of the subsequent voluntary agreement of parties subject to the compulsory pooling provisions of this order.

(19) Jurisdiction of this case is retained for the entry of such further orders as the Division may deem necessary.

DONE at Santa Fe, New Mexico, on the day and year hereinabove designated.
