RE: Black River SWD No. 1 (30-015-43807) SWD-1627

Ms. Monroe and Mr. Mahadevan:

The Division is in receipt of your request to increase the tubing size in this Devonian disposal well. Other operators have also shown interest in obtaining similar increases in tubing size for their deeper disposal well. Pursuant to the request by the Director that a hearing be conducted to assess and decide on future increases, I am forwarding information for Case No. 15654 which has been filed by Mesquite for increases in the tubing size. It benefit your request to have a discussion with their legal counsel regarding this case and the subject matter. Otherwise, the request that Matador has made for the Black River will remain under consideration pending the outcome of this case. Please contact me with any questions regarding this matter. PRG

Subject: SWD - Tubing Change Question

Mr. McMillan,

To apply to change tubing size in a currently injecting SWD (4 ½ " to 5 ½"), the UIC manual says to write a letter to the Division Director.

Other than the reason for the requested change and supporting documents, are there any other requirements to apply administratively to change the tubing?

Thanks,
Ava
