Lea County, New Mexico

RECEIVED OGD

2. The Striker 4 SWD No. 1 well is to be drilled to a total depth of approximately 18,600'. NGL proposes to utilize the well for injection of water into the Silurian-Devonian Formation through an open hole completion from 17,100' to 18,600'.

Applicant proposes injection of water at average daily rates of approximately 25,000 bbls and at maximum daily rates of approximately 32,500 bbls. The source of the injected fluids will be formation water from production wells that have been drilled and are scheduled to be drilled in the area.

4. Applicant's proposed injection operation can be conducted in a safe and responsible manner without causing waste, impairing correlative rights or endangering fresh water, public health or the environment.
