## STATEMENT OF THE CASE

Hilcorp seeks an exception to the well density requirements of Rule I.B of the Special Rules and Regulations of the Blanco-Mesaverde Gas Pool to permit it to complete and simultaneously produce five Mesaverde gas well in the same standard spacing and proration unit, and three wells in the same quarter section.

Hilcorp is the operator of a standard 320-acre, more or less, spacing and proration unit in the Blanco-Mesaverde Gas Pool comprised of the W/2 of Section 21, Township 28 North, Range 7 West, Rio Arriba County, New Mexico, in which the following four wells are currently completed and producing:

- a. San Juan 28-7 Unit 48 Well (API No. 30-039-07362), Sec. 21, T28N, R7W (Unit L);
- b. San Juan 28-7 Unit 134 Well (API No. 30-039-21329), Sec. 21, T28N, R7W (Unit K);
- c. San Juan 28-7 Unit 48A Well (API: 30-039-21947), Sec. 21, T28N, R7W (Unit D); and
- d. San Juan 28-7 Unit 134G Well (API: 30-039-30408), Sec. 21, T28N, R7W, surface-hole location (Unit D), bottom-hole location (Unit F).

Hilcorp now proposes to simultaneously dedicate and produce the following fifth well within the same standard spacing and proration unit, at the following location: **San Juan 28-7 Unit 134E Well** (API No. 30-039-22625), Sec. 21, T28N, R7W (Unit E).

Hilcorp therefore requests that the Division enter an order granting an exception to the well density requirements of Rule 1.B of the Special Rules and Regulations of the Blanco-Mesaverde Pool to authorize Hilcorp to simultaneously dedicate and produce the San Juan 28-7

Unit 134E Well within the W/2 of Section 21, Township 28 North, Range 7 West, permitting the total number of wells dedicated and producing within this spacing and proration unit to five, and the number of wells within a quarter section to three.
